Introduction

Thanks for using Tidabie Music Go!

Tidabie Music Go is a powerful all-in-one music converter to download music from Spotify, Apple Music, Amazon Music, YouTube Music, TIDAL, Deezer, and more. It is the optimal choice for downloading any songs, playlists, albums, podcasts, or audiobooks to a local computer in plain formats like MP3, AAC, WAV, FLAC, AIFF, and ALAC, allowing you to enjoy music freely on any device, at any time, and anywhere.

With up to 10X conversion speed, this tool can download your favorite music in bulk as easily as apple pie. While running at a lightning-fast speed, Tidabie Music Go also exports high-quality audio, providing an immersive listening experience to its users.

Besides, this program allows you to organize the output files as you need and preserve the ID3 tags, including titles, artist names, albums, etc. In this case, you can organize your private music library effectively. Additionally, it offers a wide range of extensive tools like AA/AAX Converter, Format Converter,

Burn CD, Audio Editor, Tag Editor, AI Lab (AI Audio Splitter), and Export to iTunes to satisfy users' special needs.

Key Features

- Download songs, albums, playlists, podcasts, audiobooks, and radio from popular streaming music services.
- Convert streaming music to MP3/AAC/WAV/FLAC/AIFF/ALAC.
- Batch-download music at up to 10x speed.
- Export lossless audio files with full ID3 tags and lyrics saved.
- Handy Tools: AI Lab (AI Audio Splitter), Export to iTunes, AA/AAX Converter, Format Converter, Burn CD, Audio Editor, Tag Editor.
- Free update & technical support.

System Requirements

Tidabie Music Go works on both Windows and macOS. Please purchase the appropriate version according to your specific needs.

Windows Computer:

- Windows 7, 8, 10, 11 (32 bits or 64 bits);
- 1GHz processor or above;
- 512 MB or higher of RAM;

- 1GB of available hard-disk space or higher;
- 1024*768 resolution display or higher Monitor.

macOS Computer:

- macOS 10.15 or later
- 1GHz processor or above;
- 512 MB or higher of RAM;
- 1GB of available hard-disk space or higher;
- 1024*768 resolution display or higher Monitor.

Purchase & Registration

- Purchase Tidabie Music Go
- Register Tidabie Music Go

Purchase Tidabie Music Go

To buy a license key for Tidabie Music Go for Windows, please click here.

To buy a license key for Tidabie Music Go for Mac, please click here.

1. Why should I buy Tidabie Music Go?

The free trial version of Tidabie Music Go only enables users to convert the first minute of each song. To unlock the trial version limitations, you should purchase a license. After purchasing, you will receive your registration information to activate the full version.

2. What Benefits do we have after Registration?

- Unlock advanced features.

- FREE upgrades to the latest versions of the same product.

- FREE technical support.

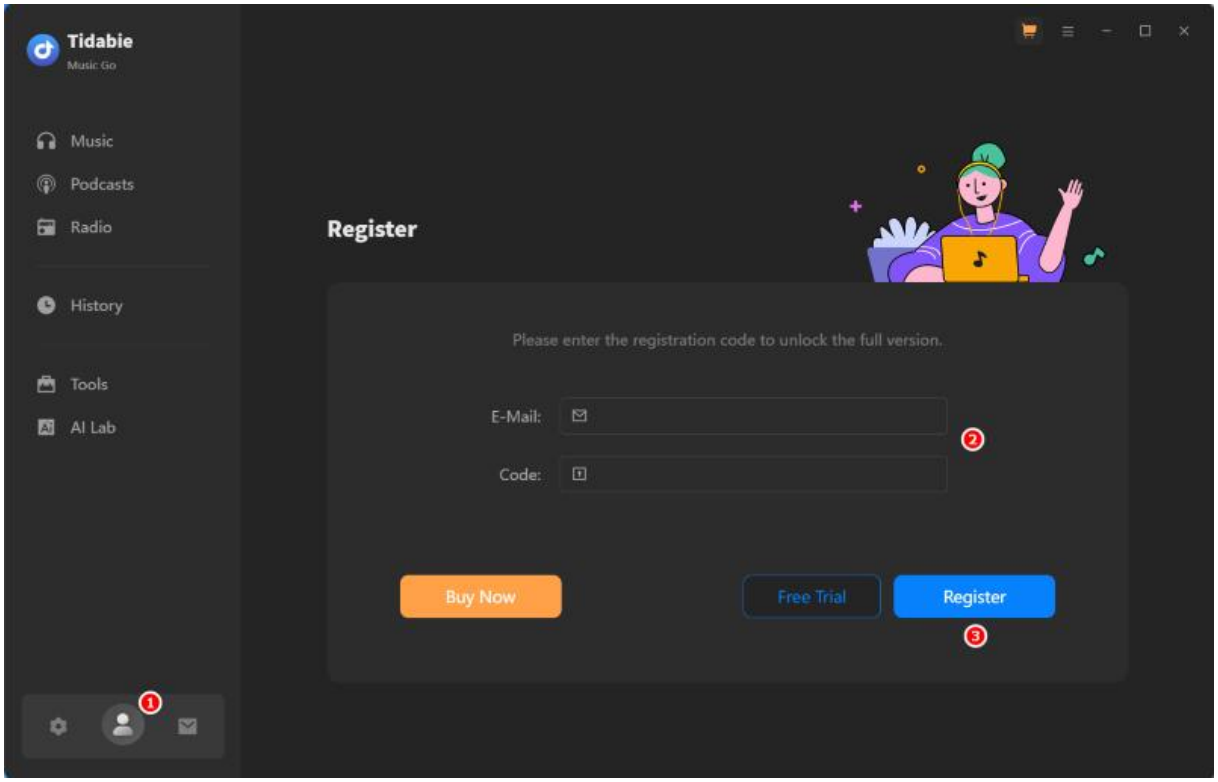
Register Tidabie Music Go

Step 1: Run Tidabie Music Go and select a target streaming platform from the main interface.

Step 2: You can simply click the blue **profile icon** to open the registration window, or click on the Menu ☰ button and "**Register**" to open the registration window as below.

Step 3: Copy and paste the registration email and code you received into the registration window, then click the "**Register**" button.

Step 4: Once you have finished the registration process, the limitations of the trial version will be removed.



Tips:

1. Make sure your computer is connected to the Internet.
2. We suggest you just copy & paste the Registration information into the pop-up dialog and do not insert any blanks before or after it. Otherwise, it may fail to register.
3. The Registration email is case-sensitive. Please read the email that contains the registration information carefully and make sure you have entered the right email address.
4. Make sure both the Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click "**Buy Now**" to get a license.
5. When your subscription is renewed, you will receive a new registration code, and you should complete the registration by these steps: Click on the "**Register**" option → Choose "**Renew License**" → Enter the E-mail and the **new code** you have received on the renewal date. → Tap on "**Confirm**".

Installation & Interface

- Installation
- Main Interface
- Menu

Installation

To install this product, please refer to the following steps:

1. Download the latest version of Tidabie Music Go through Download Center.

2. Double-click the “music-go.exe” or “music-go.zip” file to accomplish a “single-click install”.

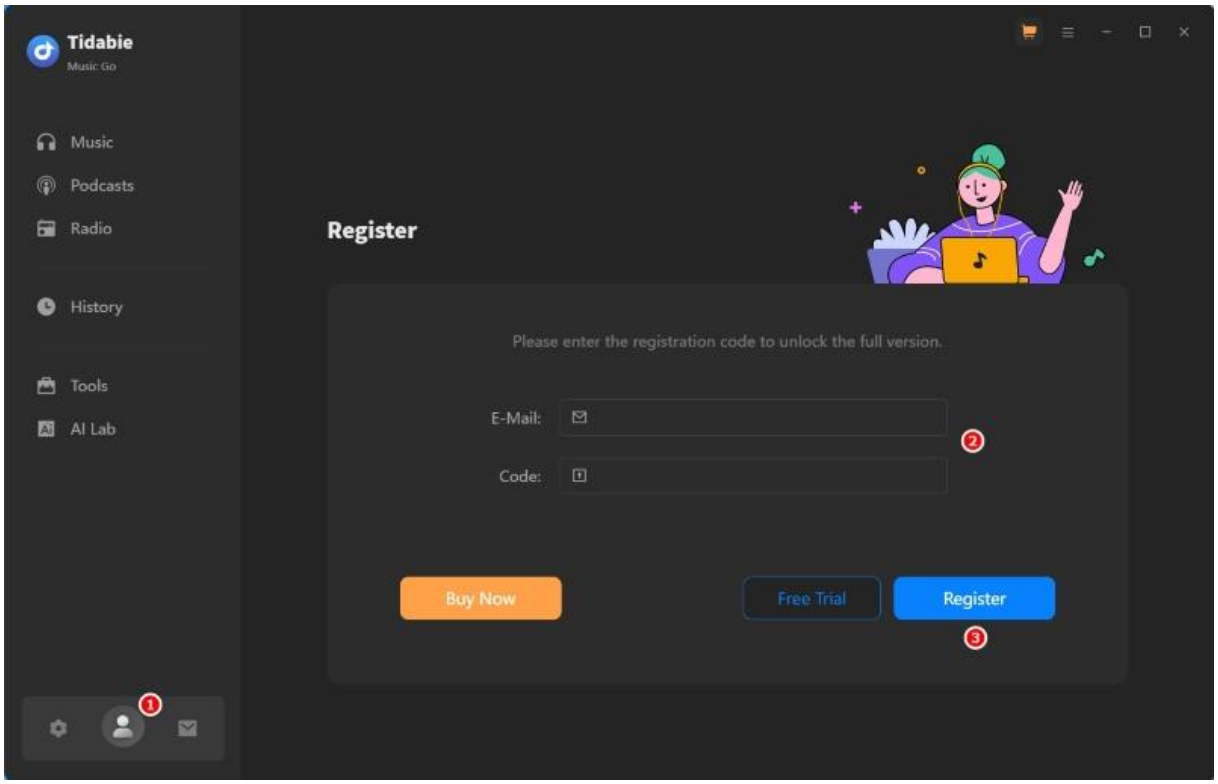
3. After installing, you can double-click it to launch the program.

Main Interface

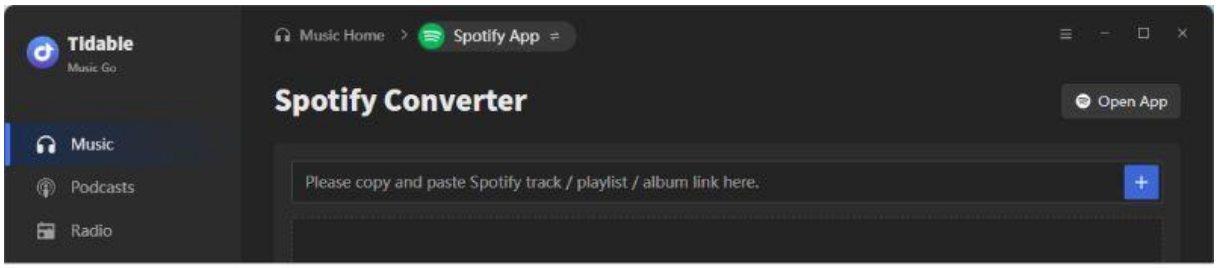
After launching Tidabie Music Go on your computer, you will see the main interface as follows. You will find entrances to different streaming music platforms. Simply choose one according to your requirements.

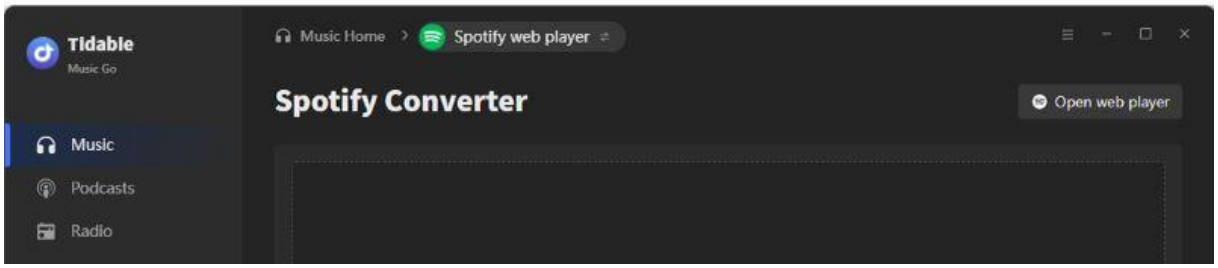
- Download **from the App:** Spotify, iTunes/Apple Music, Amazon Music, Tidal.

- Download **from the Web Player:** Spotify, Apple Music, Amazon Music, Tidal, Line Music, YouTube Music, and Pandora.
- Download **from the Website:** Audible, Dailymotion, YouTube, Vimeo, SoundCloud, etc.



Note: You can download music from the Web Player or the apps of Spotify, Apple Music, Amazon Music, or Tidal. If the Spotify app does not show up, just hit the blue **"Open App"** icon in the upper right corner to open it manually. Similarly, if you want to switch the recording source from the web player to the app, hit the **"Spotify web player"** icon at the top center of the window, then click **"Spotify App"**.

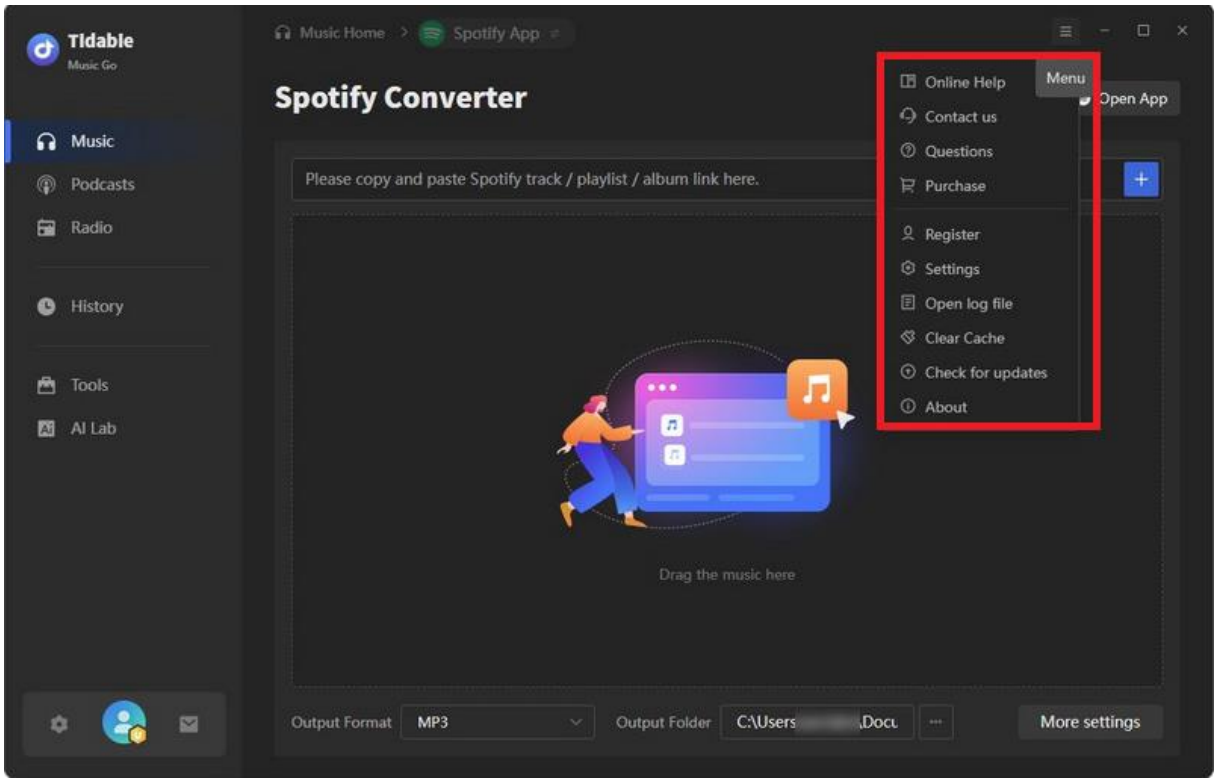




Menu

When clicking the Menu ☰ button on the upper right corner of the interface, you will see the menu list like the picture below. Here you can check for updates when a new version is available, open the online help page of Tidabie Music Go, go to Tidabie's online store, etc.

Tutorial of Tidabie Music Go



Tutorials

- Select Output Settings
- Add Music to Tidabie and Download

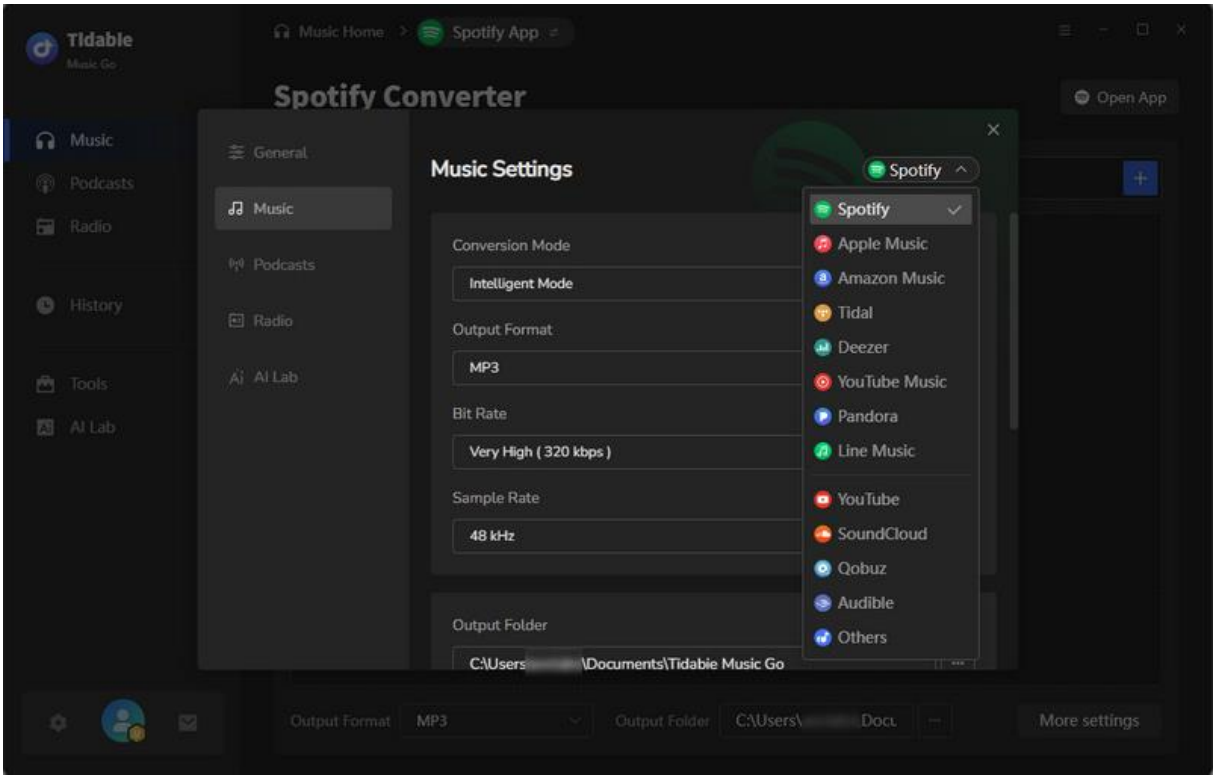
1. Download Music from the App
2. Download Music from the Web Player
3. Record Music from the Website

- Play and Record Radio Shows on Tidabie Music Go
- Play and Download Podcasts on Tidabie Music Go
- Tools on Tidabie

1. AA/AAX Converter
2. Format Converter
3. Burn CD
4. Audio Editor
5. Tag Editor
6. Export to iTunes
7. AI Audio Splitter

Select Output Settings

After selecting a streaming music platform, you can go to the “Settings” section located in the lower left corner to customize output settings. Please note that the “Settings” panel will vary depending on the streaming sources you choose. You can select different Music Settings for different music platforms by changing the options from the upper right drop-down column.



☆ Music Settings:

- **Conversion Mode:** Intelligent Mode, Record Mode, YouTube Mode
- **Output Format:** Auto, MP3, AAC, WAV, AIFF, ALAC, FLAC
- **Bit Rate:** 128 kbps, 192 kbps, 256 kbps, 320 kbps
- **Sample Rate:** 44.1 kHz, 48 kHz, 96kHz, 192kHz

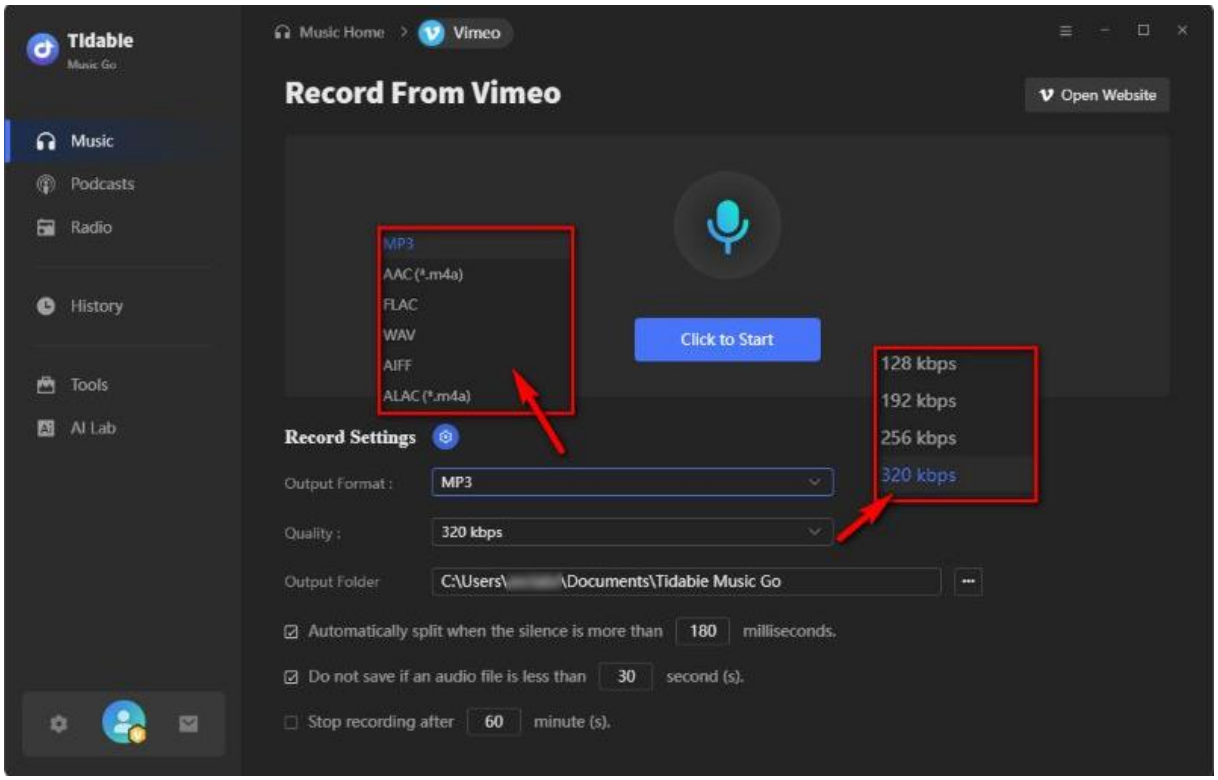
- **After Converting:** Do nothing, Open the output folder, Put the system to sleep
- **Output Folder:** Set the output path according to your needs.
- **Output File Name:** Track Number, Title, Artist, Album, Playlist Index, Year
- **Output Organized:** None, Playlist, Artist, Album, Artist/Album, Album/Artist, Playlist/Artist, Playlist/Album
- Note:

  1. If you select "Auto" as the Output format, Tidabie will download audio files in the original quality and format, which is why you cannot modify the Bit Rate and Sample Rate under this condition.
  2. Please note that when you select WAV, AIFF, ALAC, or FLAC format, you will not be able to select the bit rate by yourself. Since these formats are lossless audio formats, the program will download music at the best bit rate in this case.
  3. When you select downloading music from the YouTube Music Web Player, there is no conversion mode option.

When recording music from websites like YouTube, SoundCloud, Dailymotion, and Vimeo, the "Settings" panel is a bit different from other music platforms. You can modify the settings options as follows:

- **Output Format:** MP3, AAC, WAV, AIFF, ALAC, FLAC
- **Quality/Bit Rate:** 128 kbps, 192 kbps, 256 kbps, 320 kbps
- **Output Folder:** Set the output path according to your needs.

- 
Additionally, you can also choose the output settings from the home page directly. Here is a relative picture.



When converting audiobooks from Audible, you can modify the settings options as follows:

- **Output Format:** Original, M4A, M4B, and MP3
- **Quality:** High Quality or Small Size
- **After Converting:** Do nothing, Open the output folder, Put the system to sleep
- **Output Folder:** Set the output path according to your needs.

Apart from the Music Settings, you can also change other settings options like Podcast Settings, Radio Settings, AI Lab Settings, and General Settings in the "Settings" module.

☆ Podcasts Settings:

- **Output Folder:** Set the output path according to your needs.
- **After Converting:** Open the output folder, Do nothing, Put the system to sleep

☆ Radio Settings:

- **Output Format:** MP3, AAC, FLAC, WAV, ALAC, AIFF
- **Quality:** 128 kbps, 192 kbps, 256 kbps, 320 kbps
- **Output Folder:** Set the output path according to your needs.
- Automatically split files when the duration exceeds (xxx) minutes.
- Stop recording after (xxx) minute(s).

☆ AI Lab Settings:

- **Output Format:** MP3, M4A, FLAC, WAV, OGG, AIFF
- **Quality:** 128 kbps, 192 kbps, 256 kbps, 320 kbps
- **Output Folder:** Set the output path according to your needs.

☆ General:

- **Appearance:** Light, Dark
- **Language:** 48 languages are available.

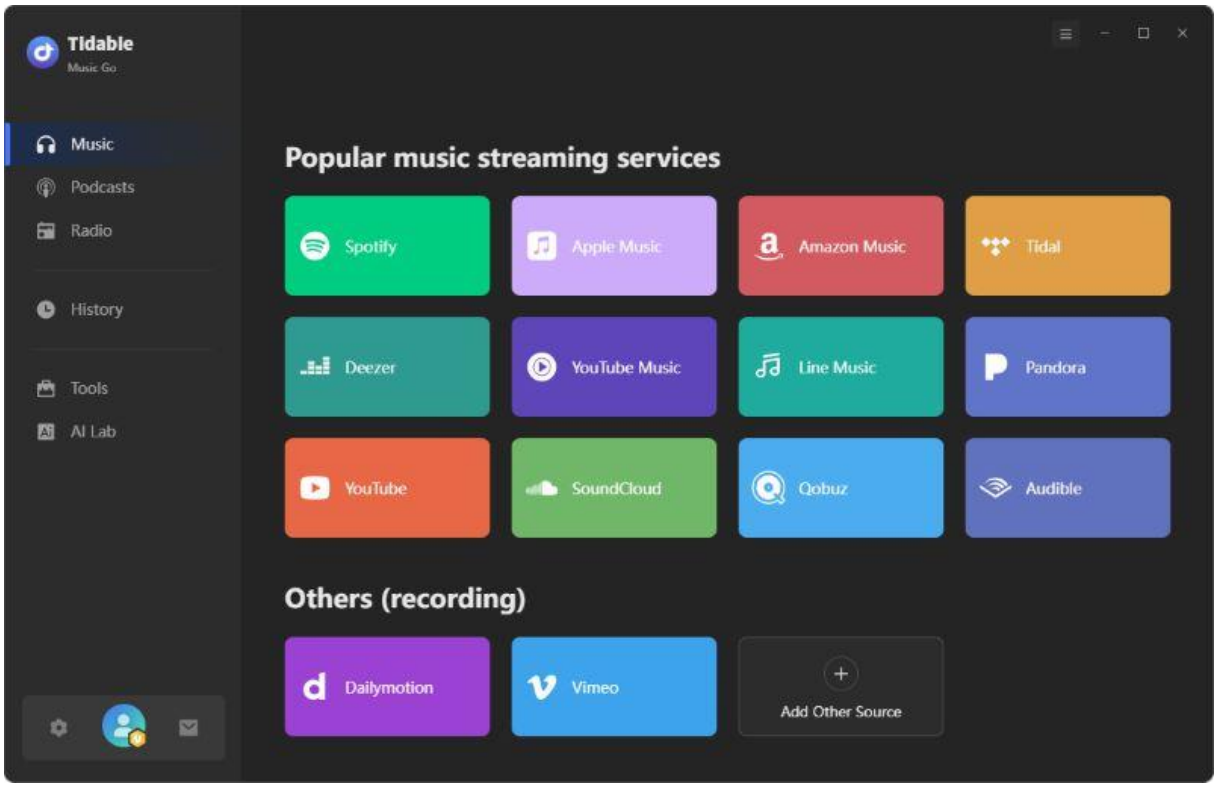
Add Music to Tidabie and Download

1. Download Music from the App

Step 1: Select Music Source

When you first launch Tidabie Music Go on your computer, you will see the main interface where some major streaming music platforms are listed. If you would like to download high-quality music, you can download music from the app. As mentioned above, you can record music from Spotify, iTunes/Apple Music, Amazon Music, or Tidal apps. Here, we take Spotify as an example.

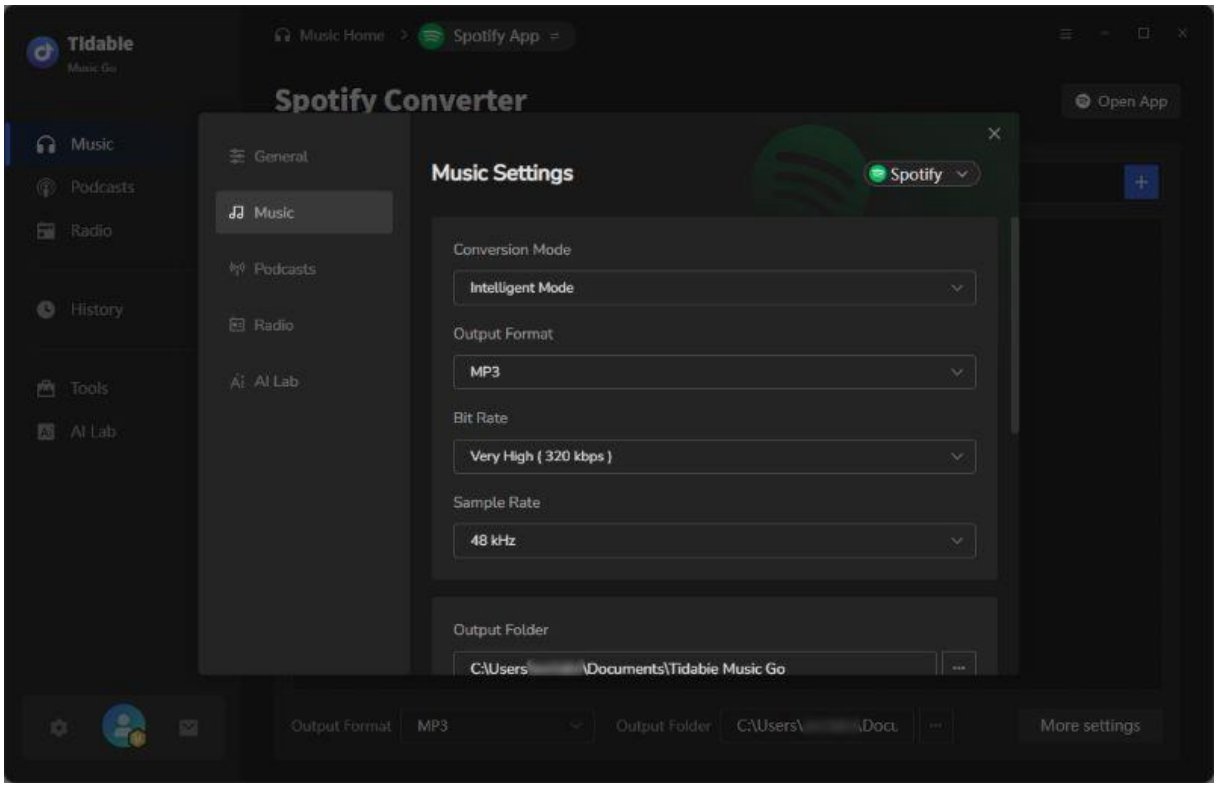
Tap on the “Spotify” tag from the main interface. Please note that you should first install the app on your computer. Normally, once you click on it, the preinstalled Spotify app will pop up. Then you need to log in to your Spotify account to access your online music library.



Note: If the Spotify app does not show up, just hit the blue **"Open App"** icon in the upper right corner to open it manually. Similarly, if you want to switch the recording source from the web player to the app, hit the **"Spotify web player"** icon at the top center of the window, then click **"Spotify App"**.

Step 2: Customize Output Settings

Navigate to the "**Settings**" module on the left-side bar. You can adjust different settings according to your actual needs. (For more details about settings options, please refer to the *Select Output Settings* section.)



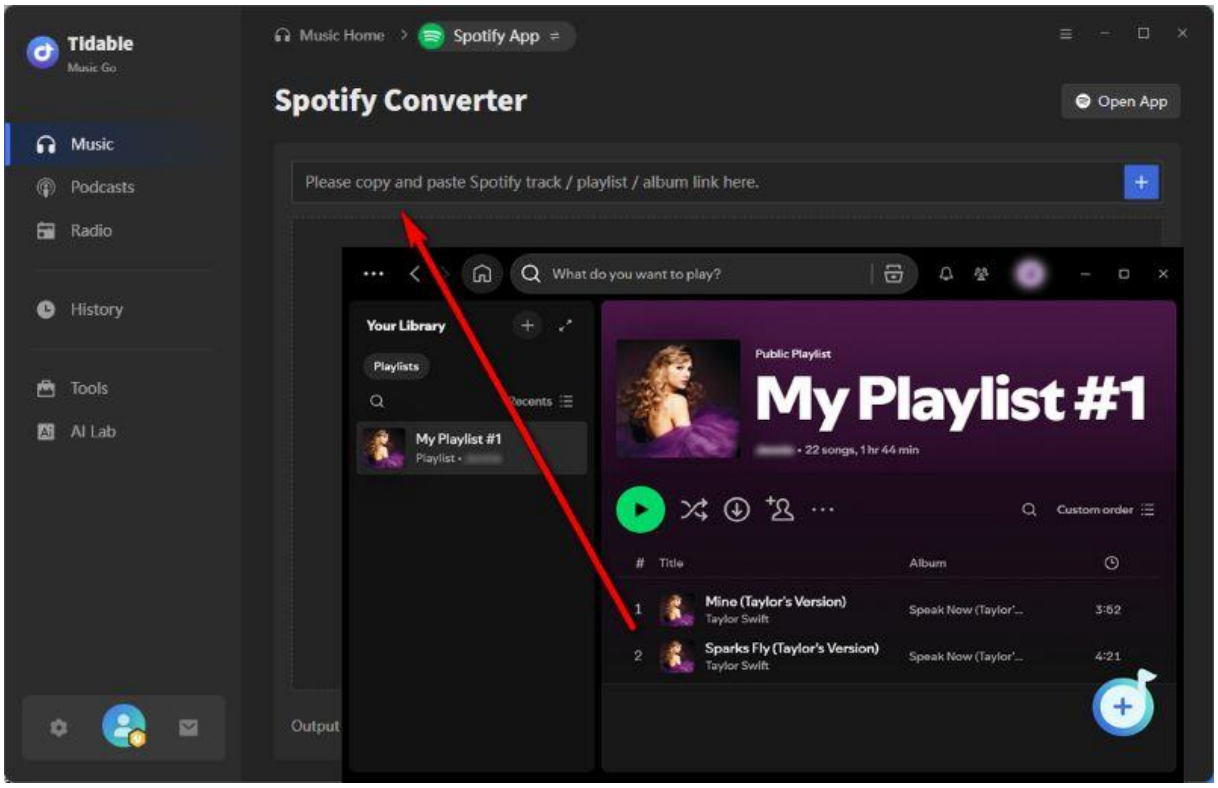
Step 3: Add Music to Download Task List

Go to the "**Music**" page after finishing the settings. The next step is to add songs to the task list. You have three choices to add songs.

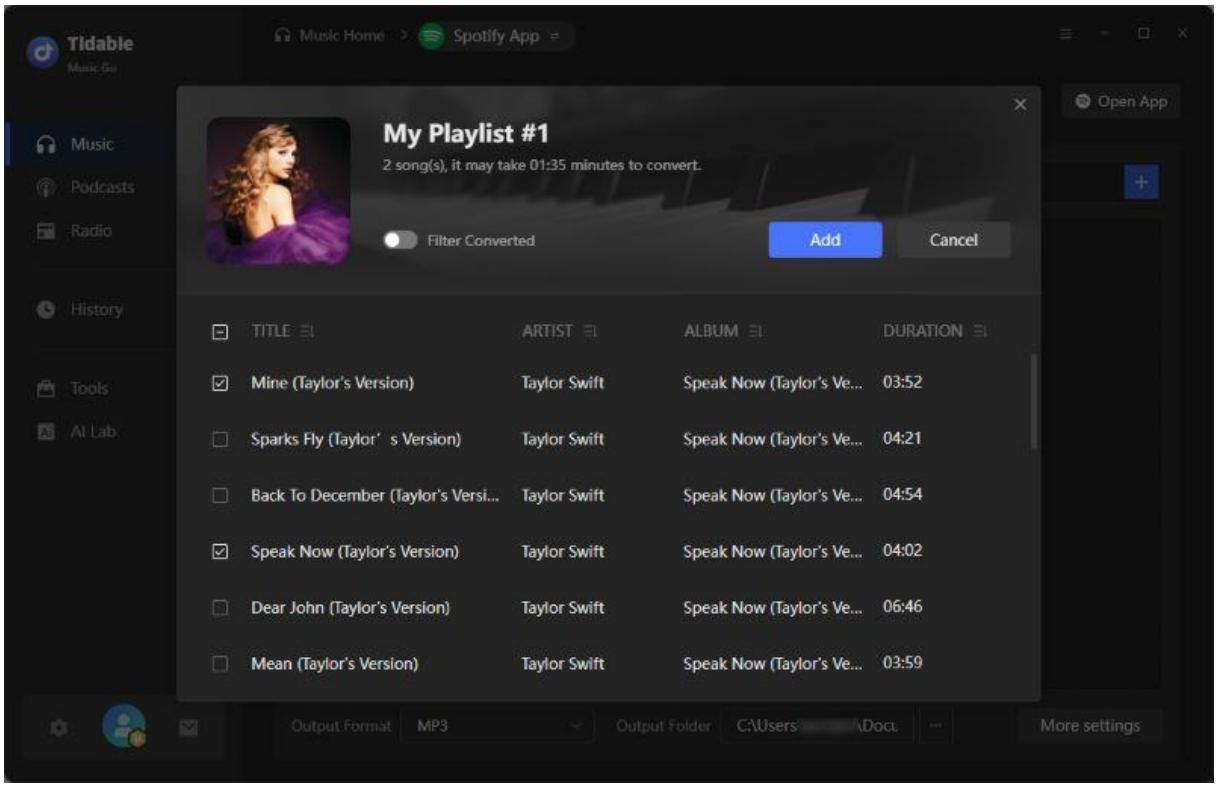
Method 1: Drag and drop a song/album/playlist from the Spotify app to Tidabie's "**Drag the music here**" area and start parsing.

Method 2: Copy and paste the URL of any song/album/playlist to Tidabie's parsing box on the "Music" page.

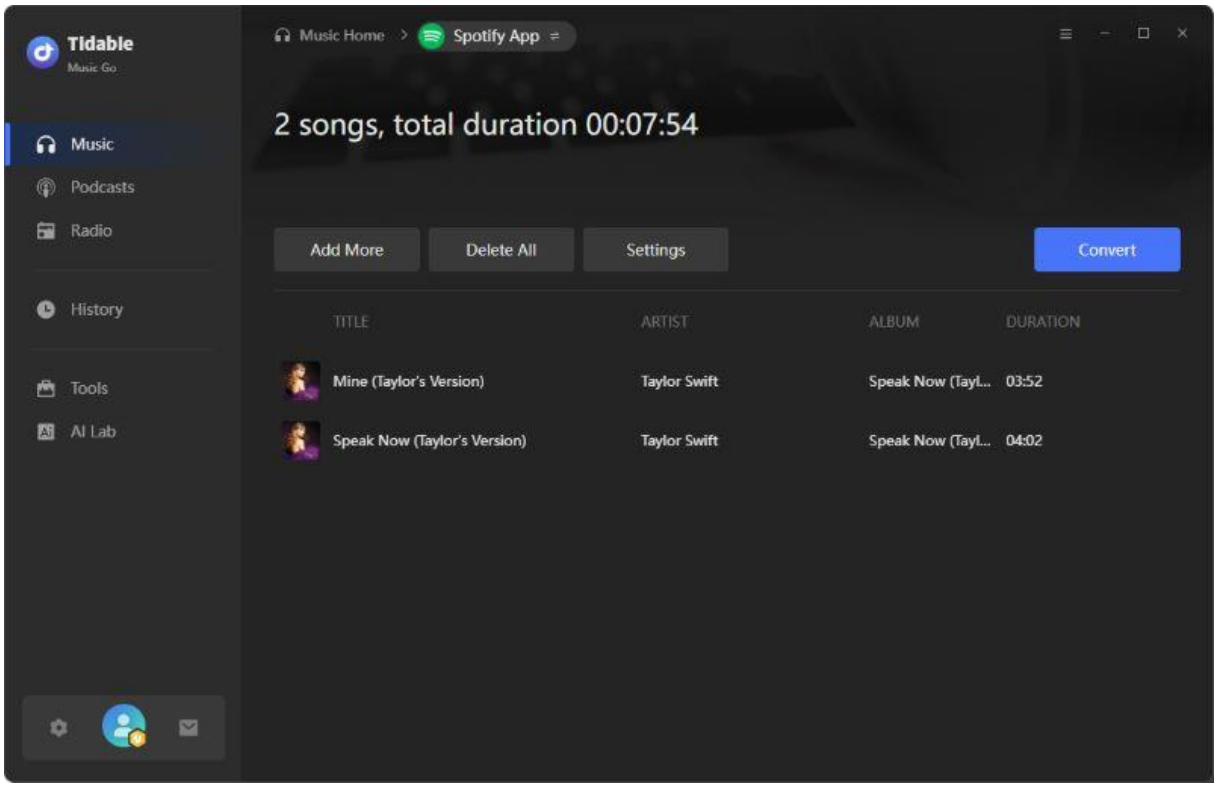
Method 3: Open any song/album/playlist, and click on the "**Click to add**" button in the lower right corner.



After parsing, a new window will pop up and all the tracks from your chosen album/playlist will be listed there. Then just tick your desired tracks and click on the "**Add**" icon.

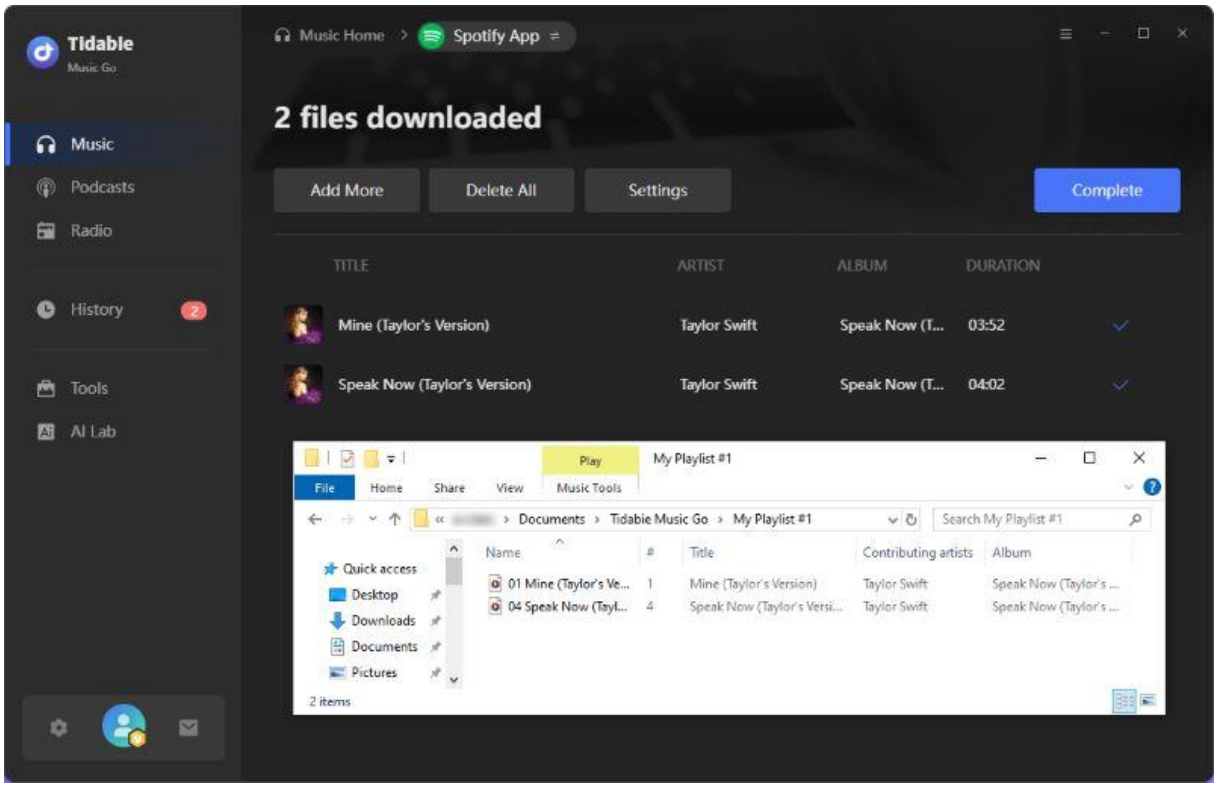


Step 4: Click on "**Add More**" if you want to choose more songs. If not, hit "**Convert**" to start downloading.



Step 5: Check the Downloaded Music Files

Go to the "**History**" module, you can check the download history. By clicking on the folder icon of each song, you will be directed to the local address of the song.

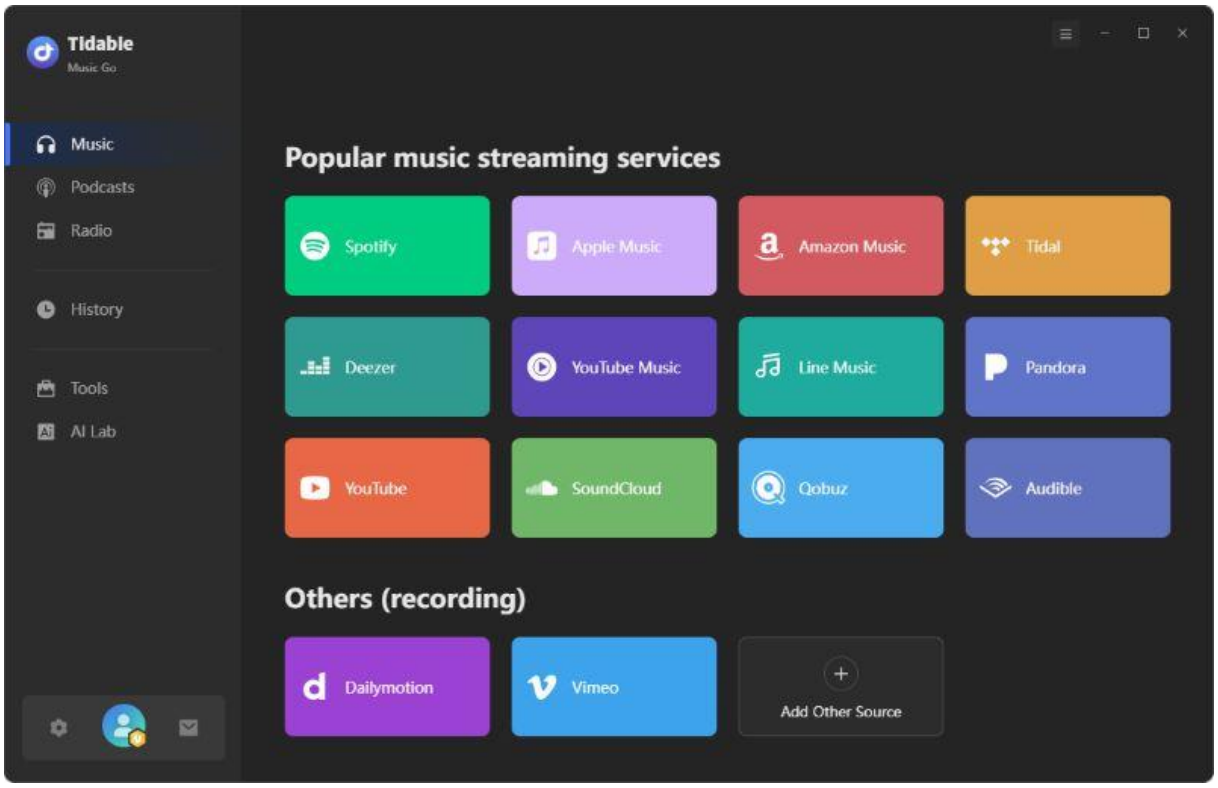


2. Download Music from the Web Player

Downloading music from the built-in web player enables you to download music with up to 10x speed. Here, we take the Spotify web player as an example.

Step 1: Select Music Source

Click on the “Spotify” tag on the main interface. The embedded Spotify web player will pop up automatically. Follow the on-screen instructions to log into your Spotify account.

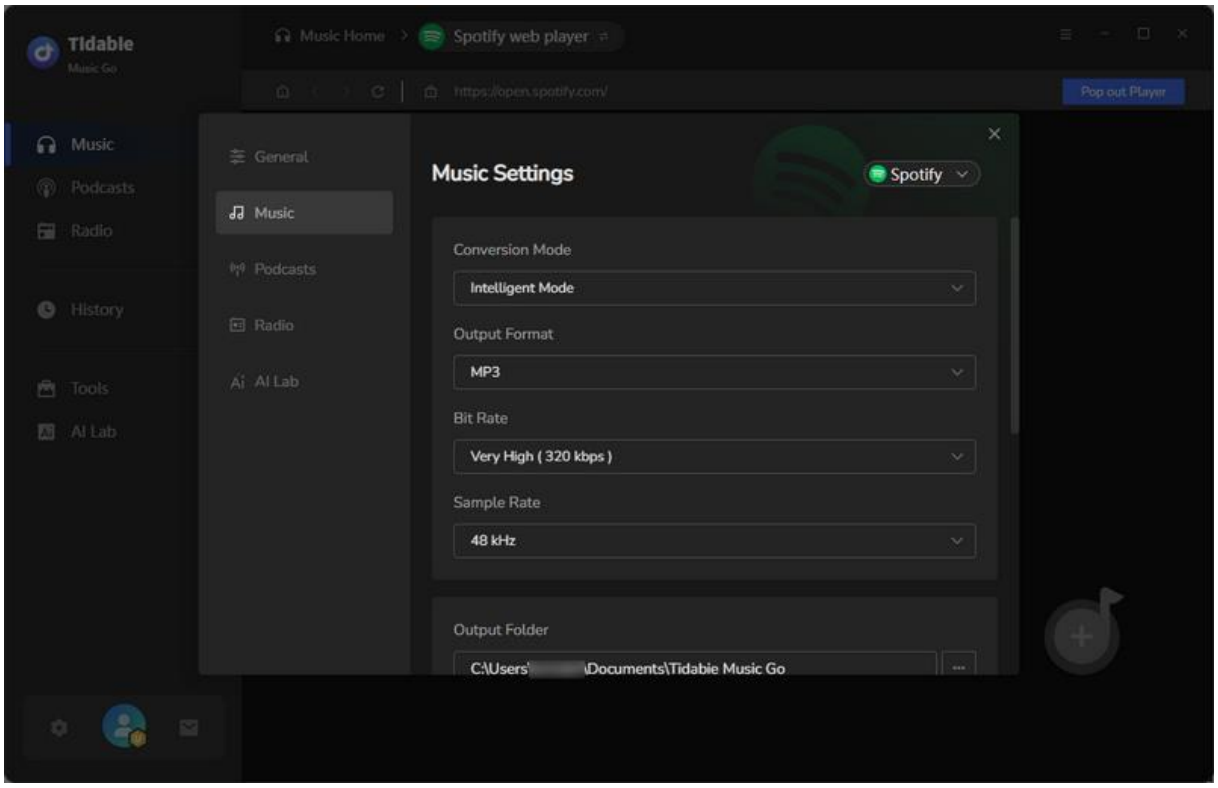


Note: To keep the Spotify web player within Tidabie Music Go, click the blue **"Keep in Converter"** icon in the upper-right corner. To use a standalone Spotify web player window, click **"Pop out Player"**.

Step 2: Customize Output Settings

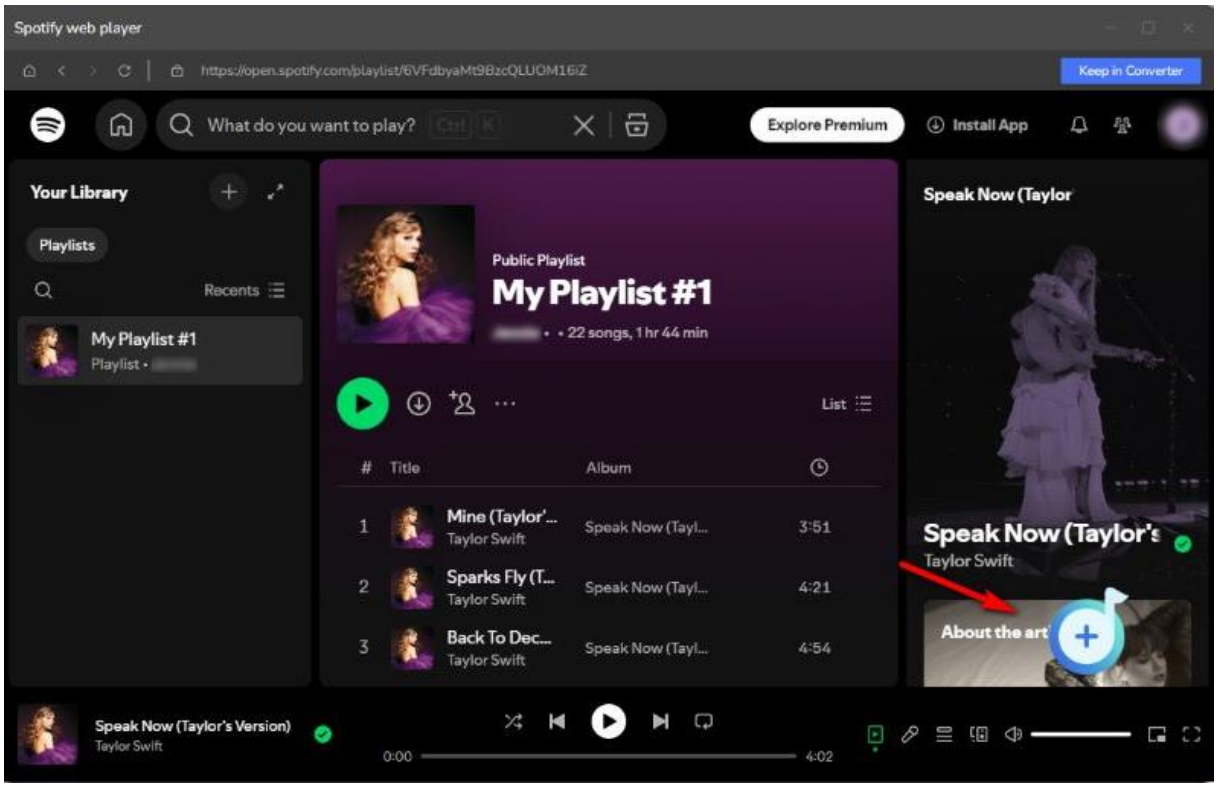
Navigate to the "**Settings**" module, you can customize the output parameters as you wish. (For more details about settings options, please refer to the *Select Output Settings* section.)

Tips: If you select "**Auto**" as the Output format, Tidabie will download audio files in the original quality and format.

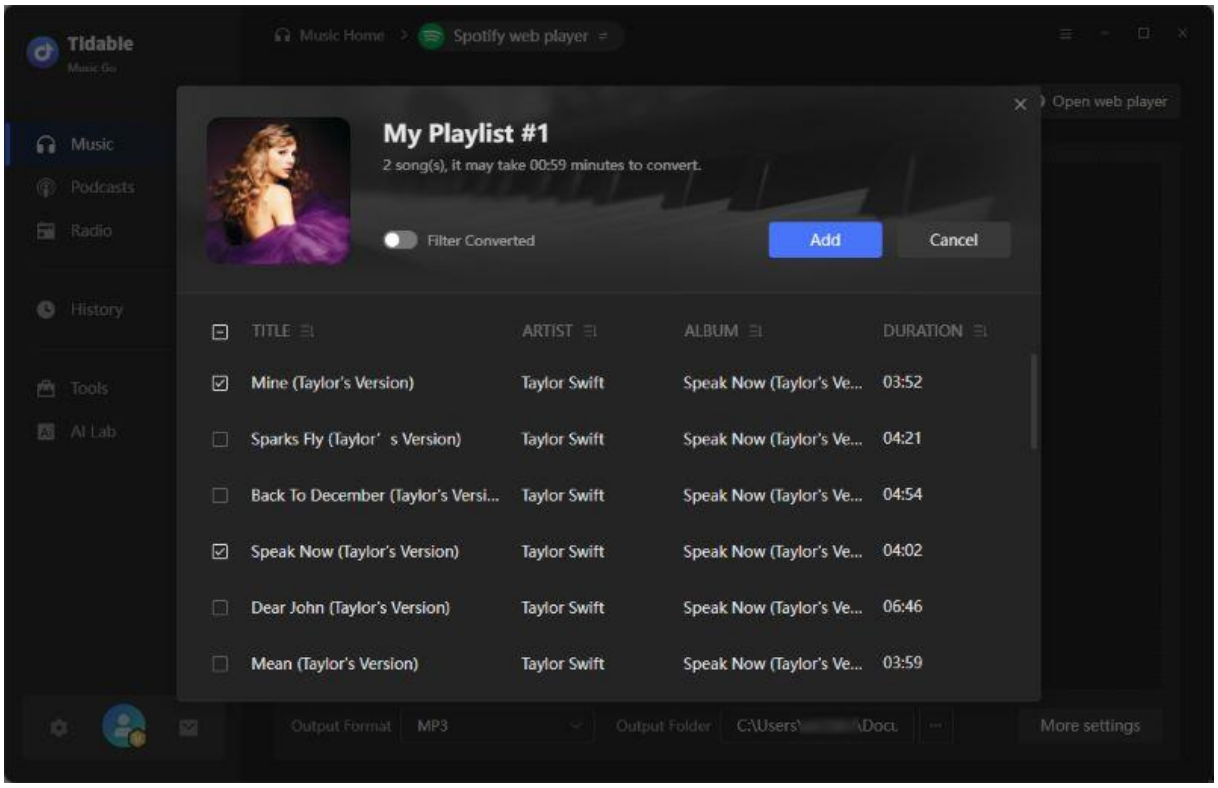


Step 3: Add Music to Download Task List

Turn to the Spotify web player. Open your desired song/album/playlist and hit the blue **"Click to add"** button to parse songs.

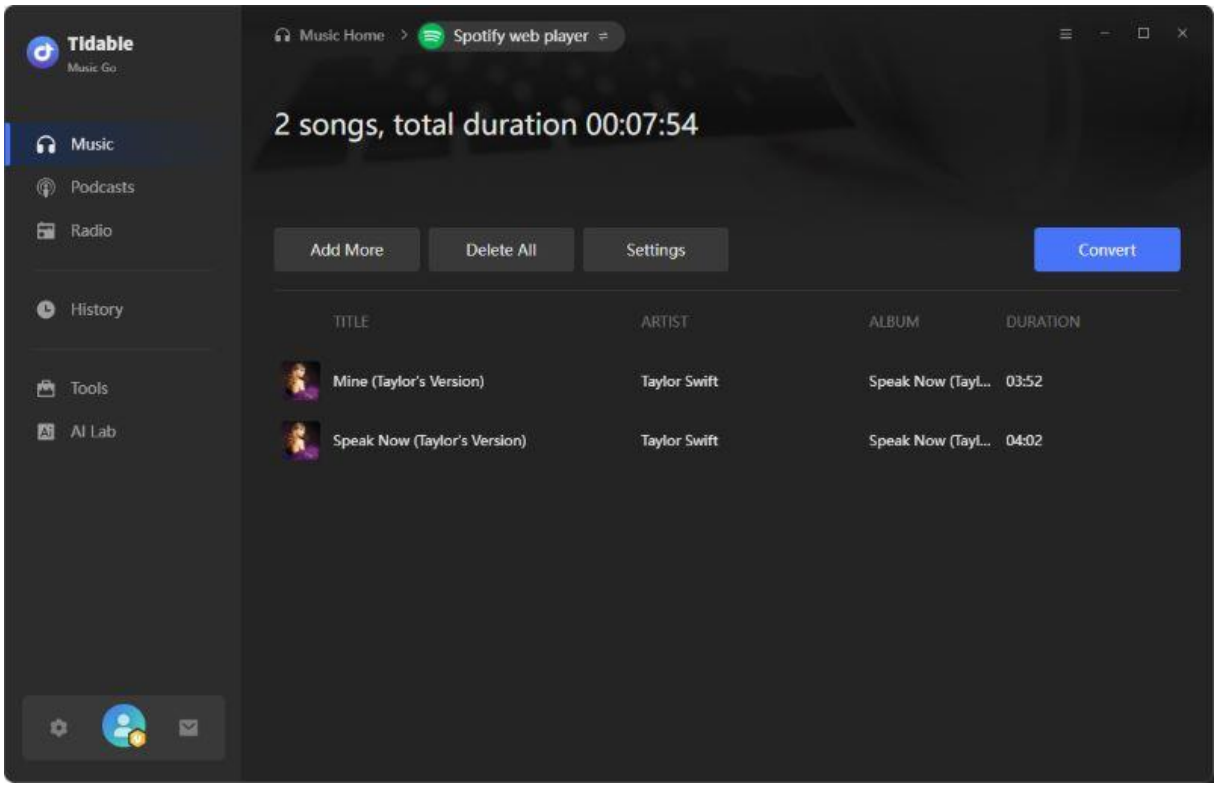


Tick the songs you want and tap on the "**Add**" button.



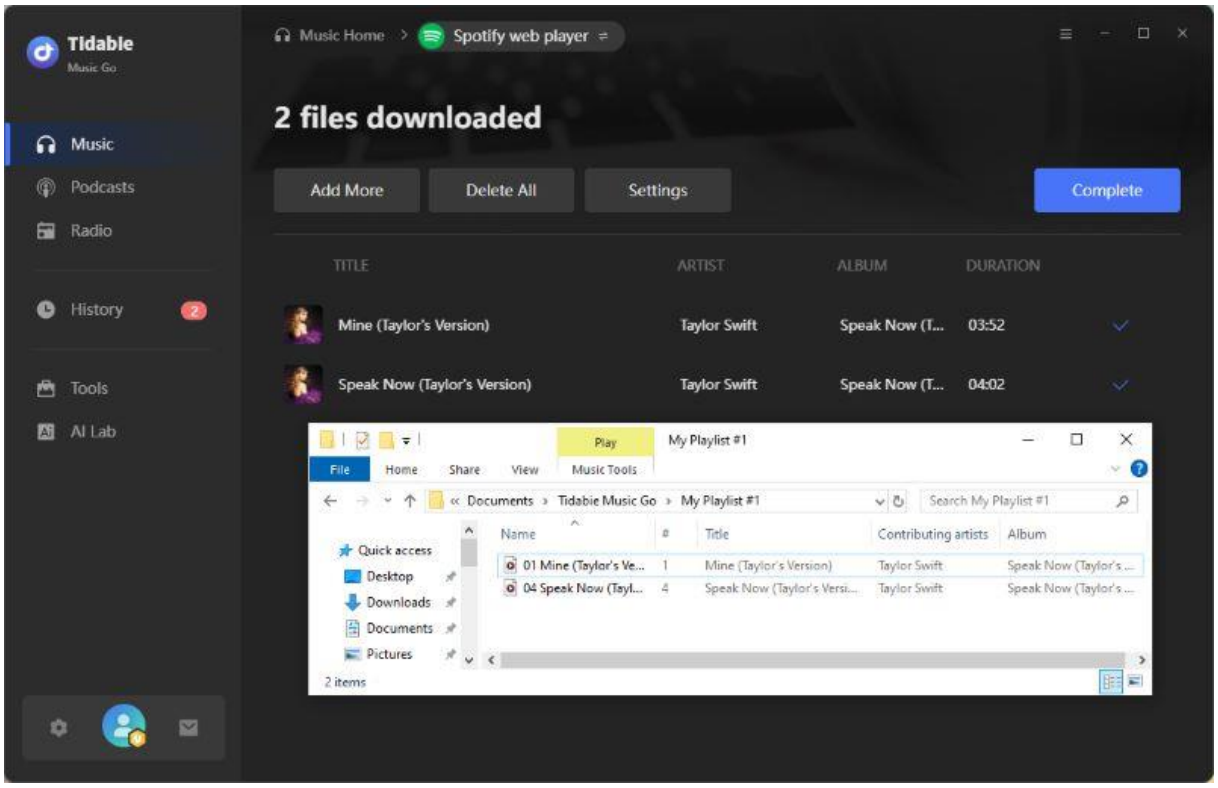
Step 4: Start Downloading

If you would like to batch download more songs from different playlists/albums, just click "**Add More**" and repeat the adding actions. Once you have finished choosing, tap on "**Convert**".



Step 5: Check the Downloaded Music Files

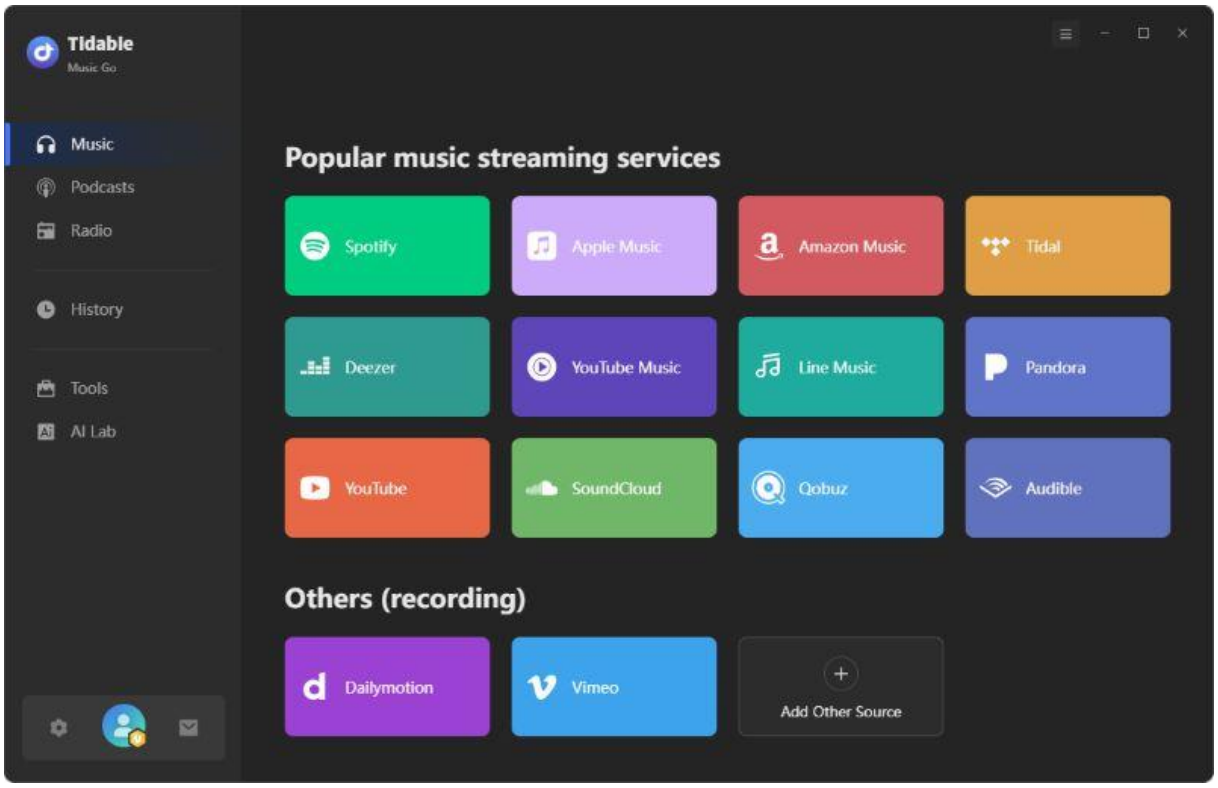
You can navigate to the "**History**" module to check the downloaded music files once the downloading process is complete.



3. Record Music from the Website

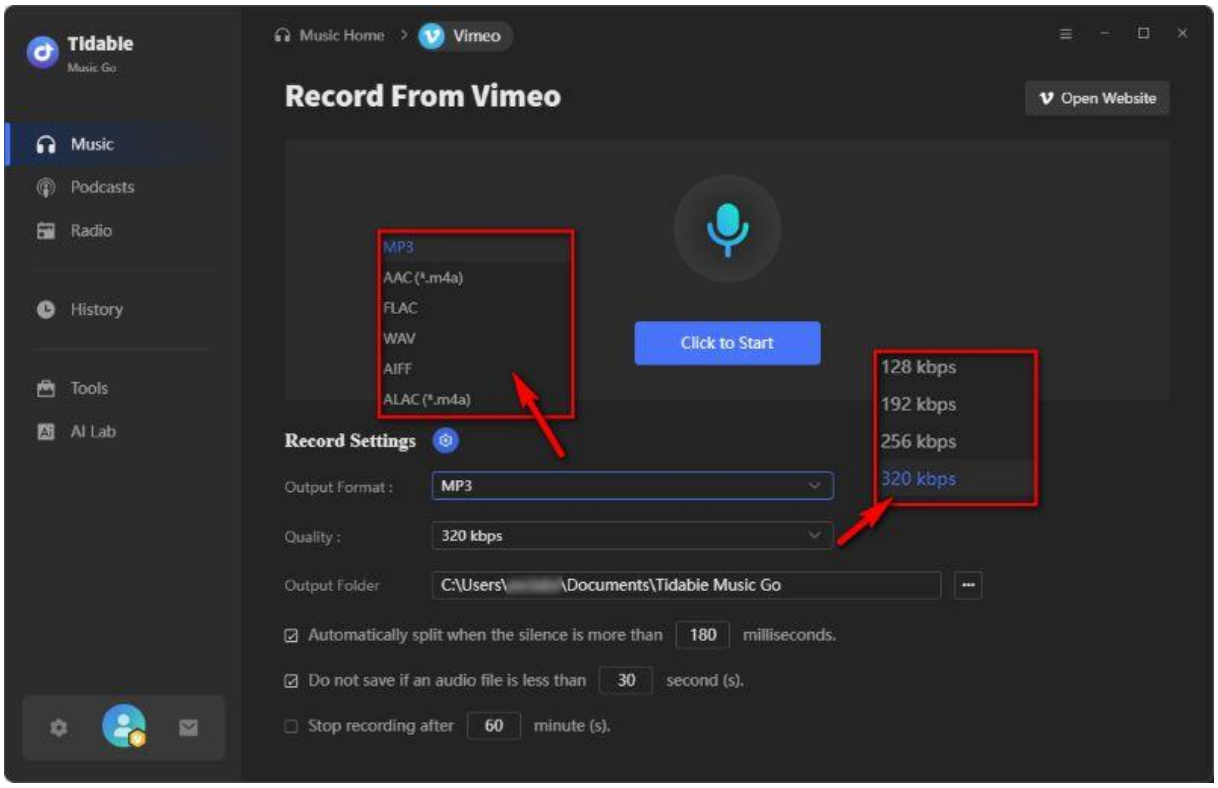
Step 1: Select Music Source or Add Other Website Source

You can choose a music source from the options displayed on the main interface. Or you tap on the "**Add Other Source**" to record music from the platform you want. The latter option requires you to enter a name and a URL to access the platform. Here, we take Vimeo as an example. Simply tap on "Vimeo" to initiate the built-in Vimeo website. Next, log in to your account.



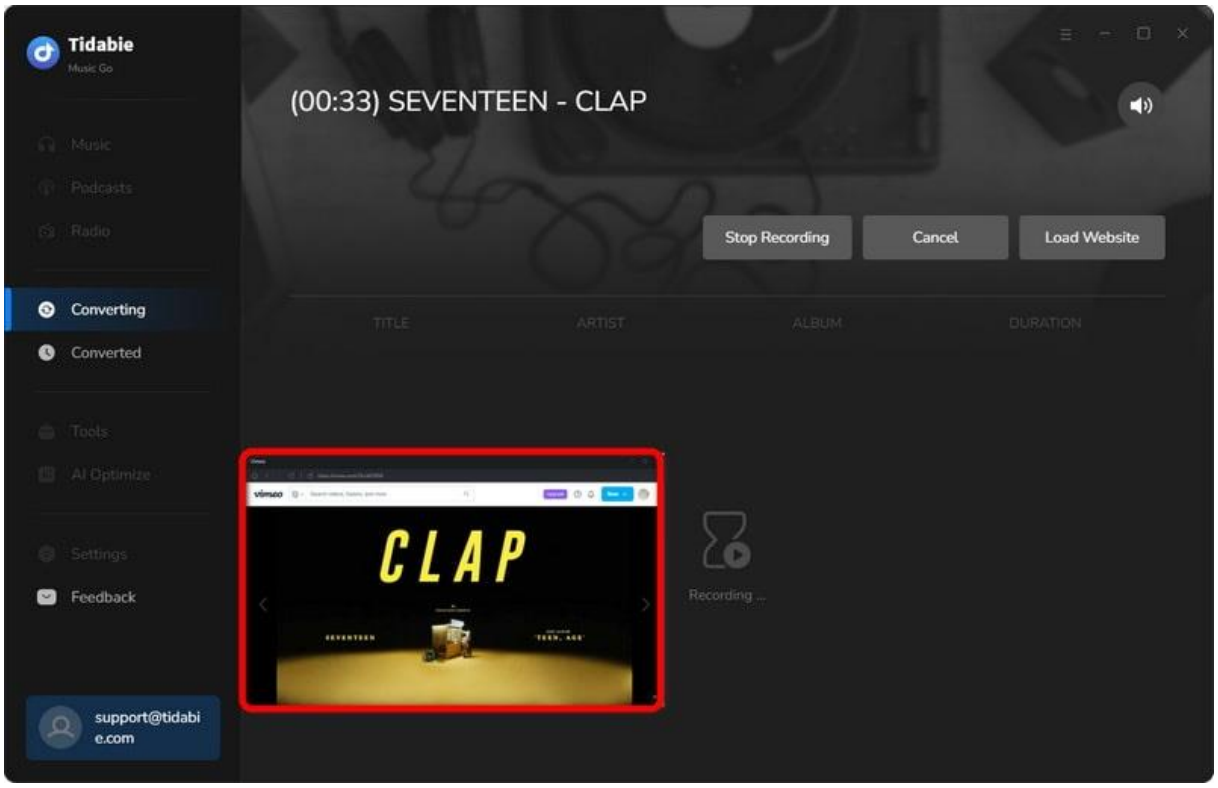
Step 2: Select Music Source or Add Other Website Source

Go to the "**Music**" page, you will be able to customize the record settings directly. More settings are available under the "Settings" module. (For more details about settings options, please refer to the *Select Output Settings* section.)



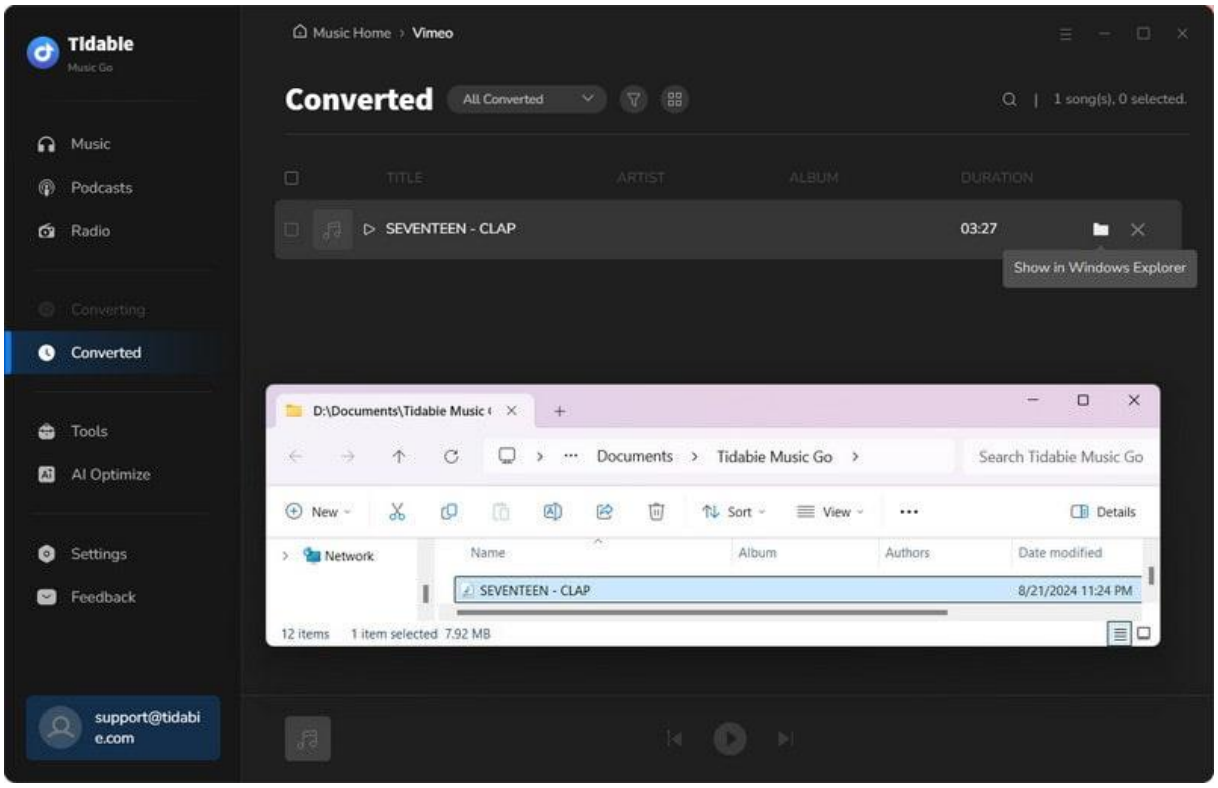
Step 3: Start Recording

Open the music you wish to record and start recording by clicking the "**Click to Start**" button. Hit "Stop Recording" when you want to end the recording.



Step 4: Select Music Source or Add Other Website Source

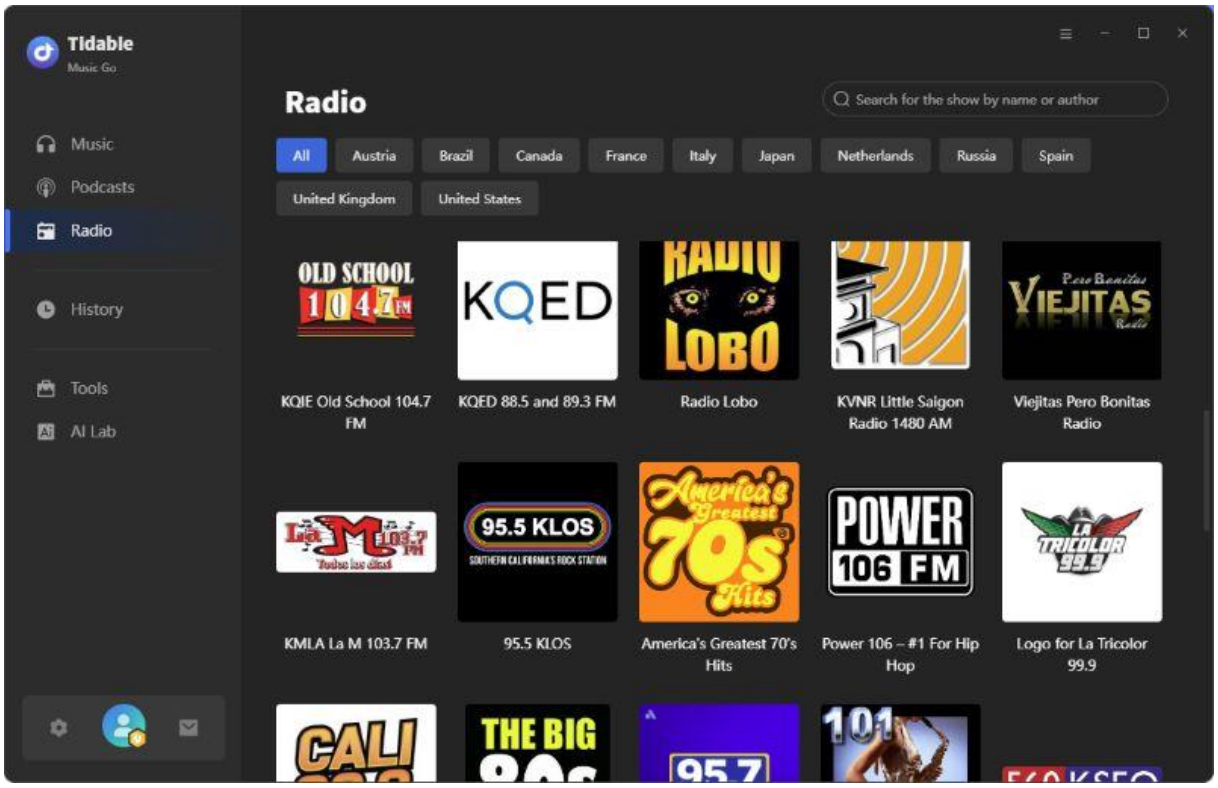
When the recording is finished, the music files will be stored in the designated folder. You can navigate to the "**History**" section located in the left-side menu bar to check the downloaded tracks. In addition, hitting the folder icon will lead you to the output folder directly.



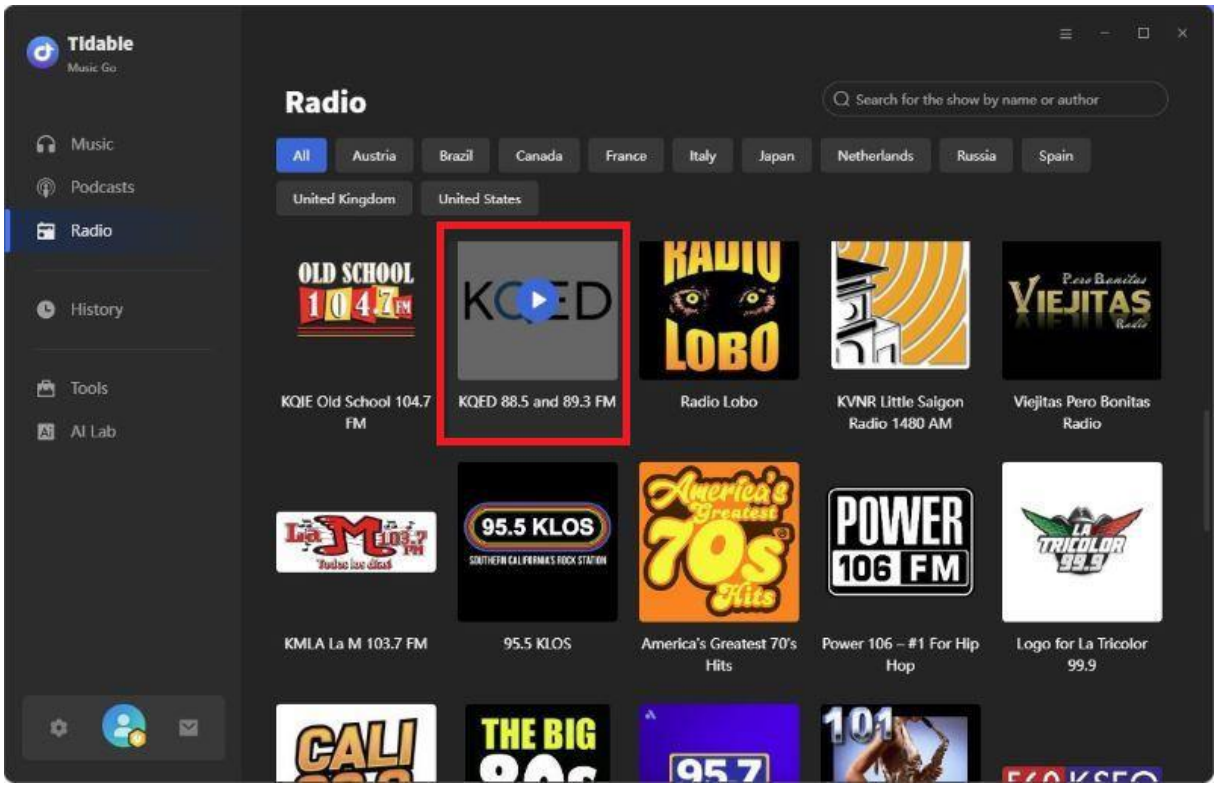
Play and Record Radio Shows

4. 1. Play Radio Shows on Tidabie Music Go

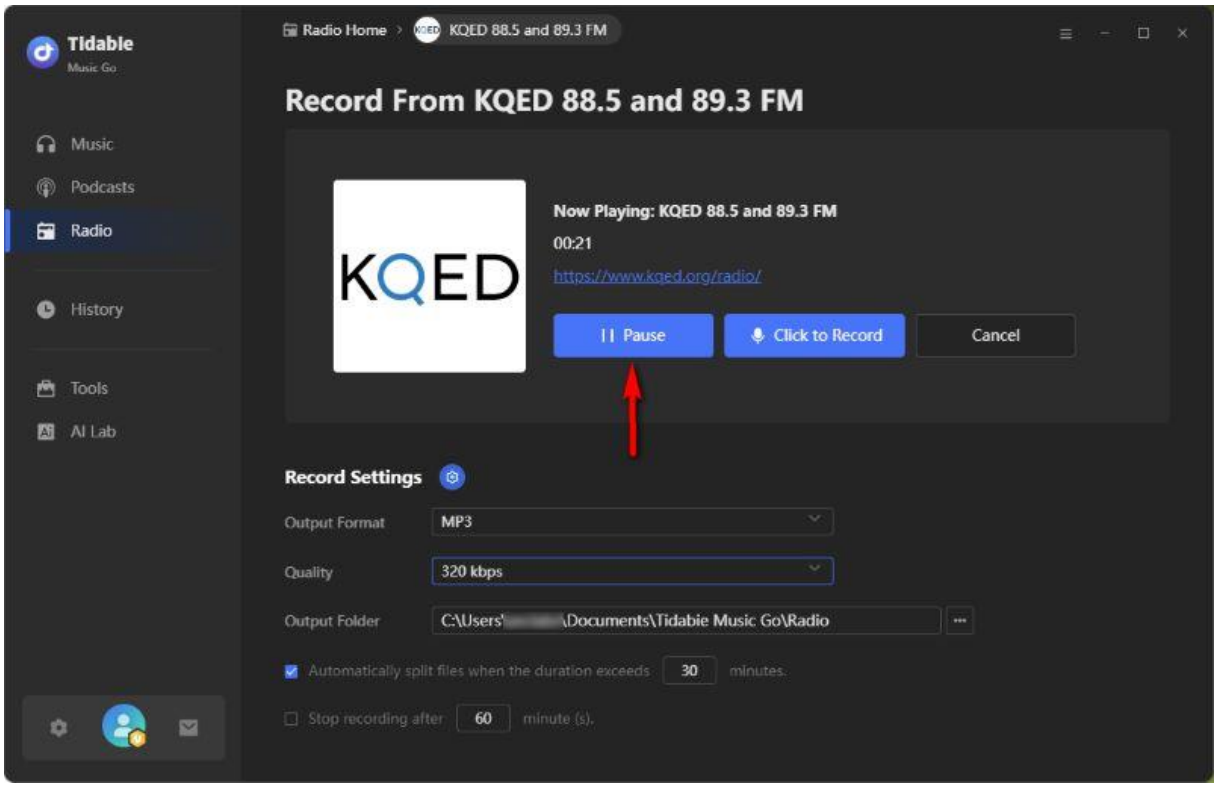
Step 1: Launch Tidabie Music Go and head to the "**Radio**" module. You can find your preferred radio programs in this module.



Step 2: Tap on any radio program, and you will be directed to the full page of the radio program, and it will start playing immediately.

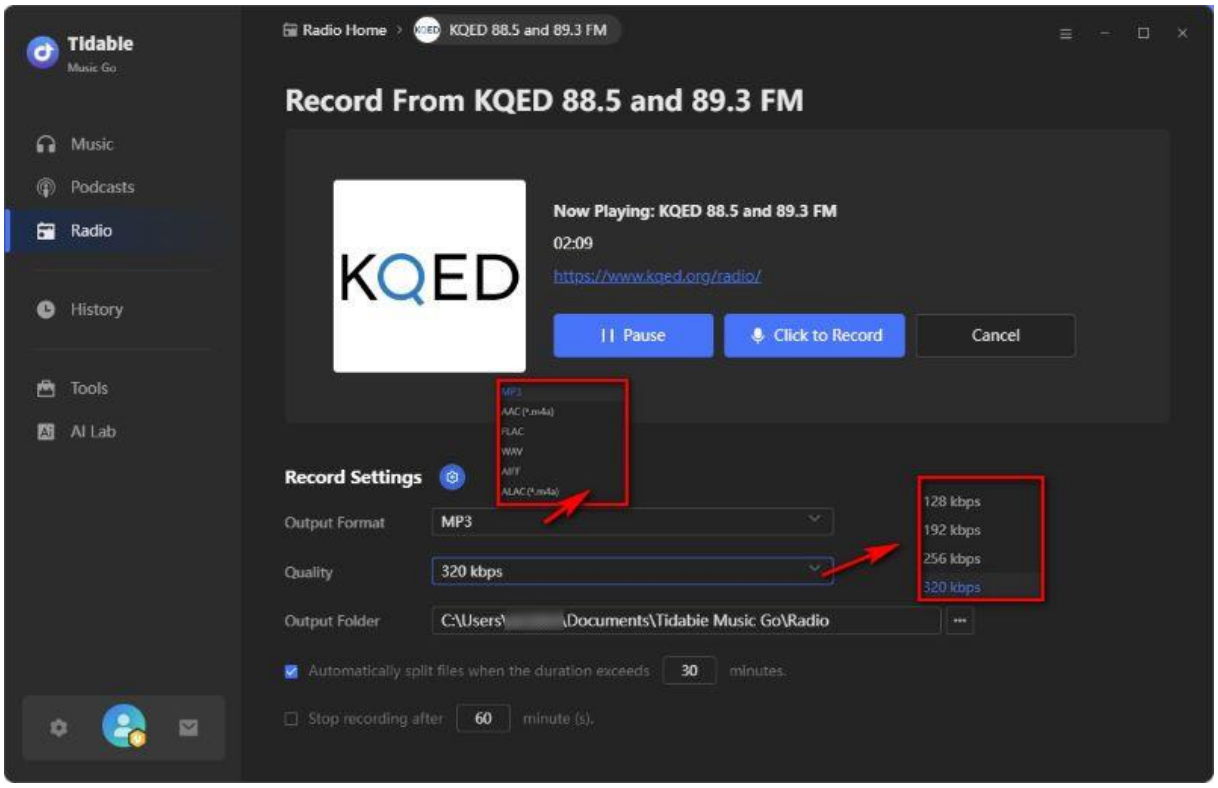


Additionally, you can stop playing the radio by clicking the "**Pause**" button or restart by clicking "**Play**".

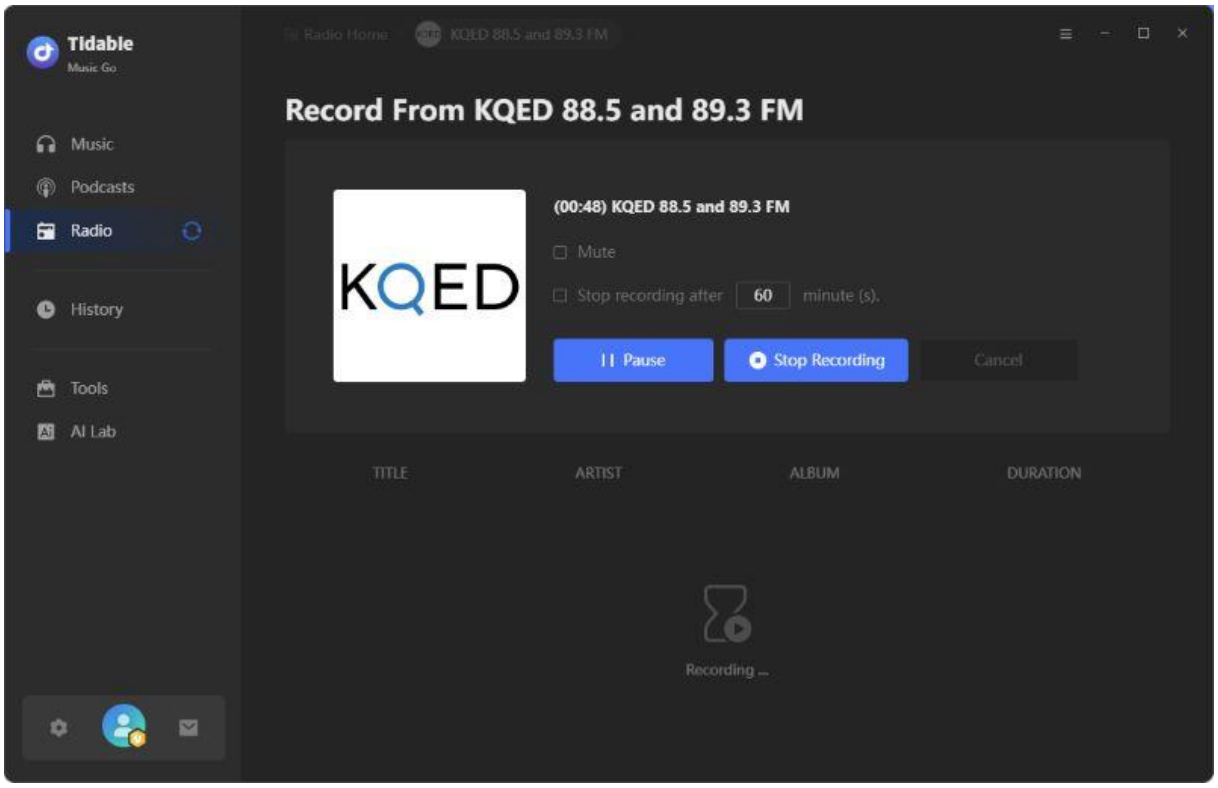


5. 2. Record Radio Shows on Tidabie Music Go

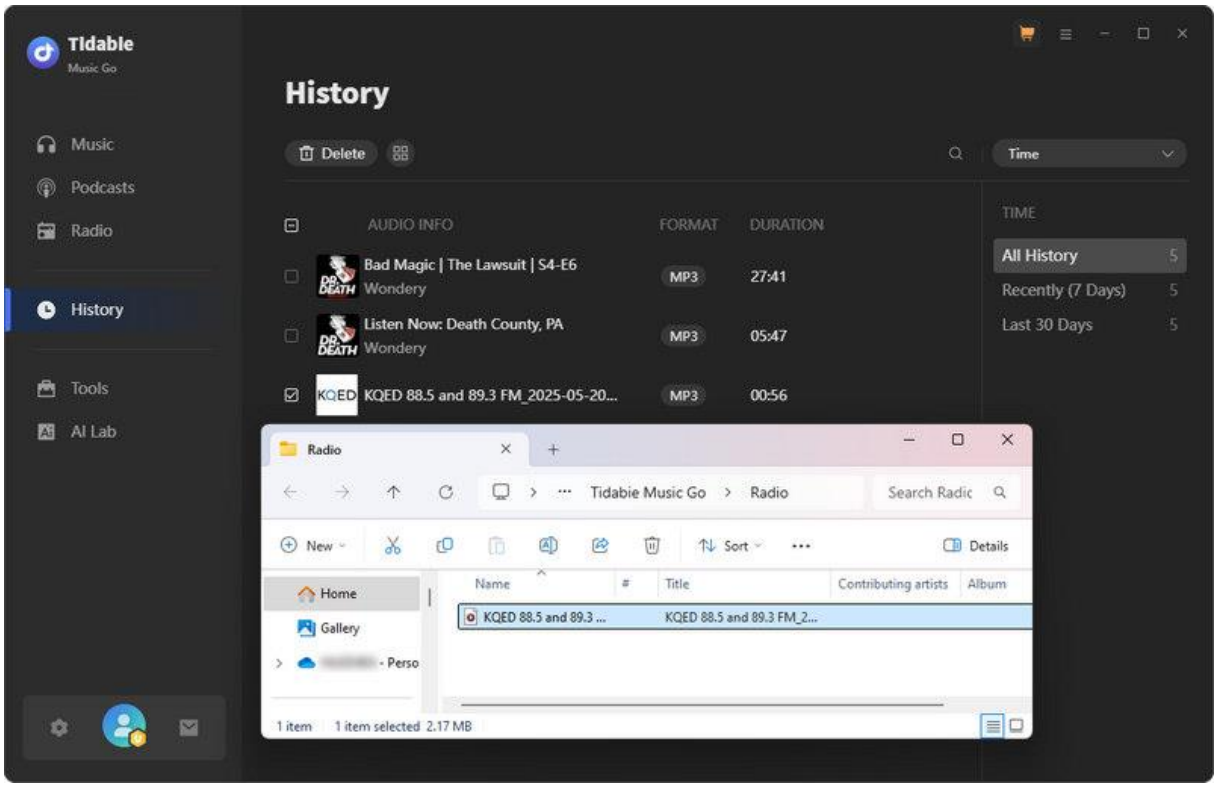
Step 1: Before recording, you may change the output format, quality, and output folder path, or you can decide when to stop recording, according to your requirements.



Step 2: Tap on the "**Click to Record**" button to start recording the radio show. If you haven't set an automatic stop recording time, you can manually stop it by hitting "**Stop Recording**". In addition, it is worth mentioning that Tidabie allows background recording. By ticking the "**Mute**" box, the program will record the radio show in the background, which means you can handle multiple tasks on your computer while recording.



Step 3: After finishing recording, you may find the recorded audio files in the "**History**" section.

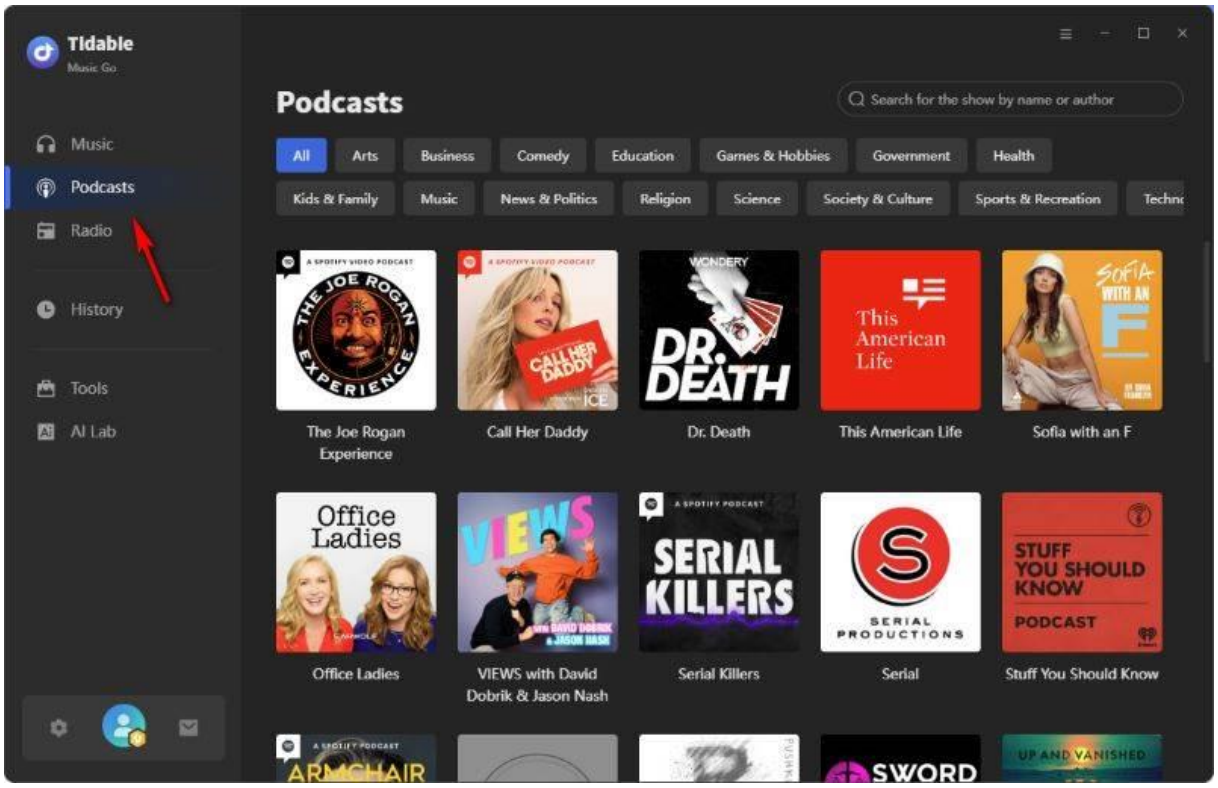


Play and Download Podcasts

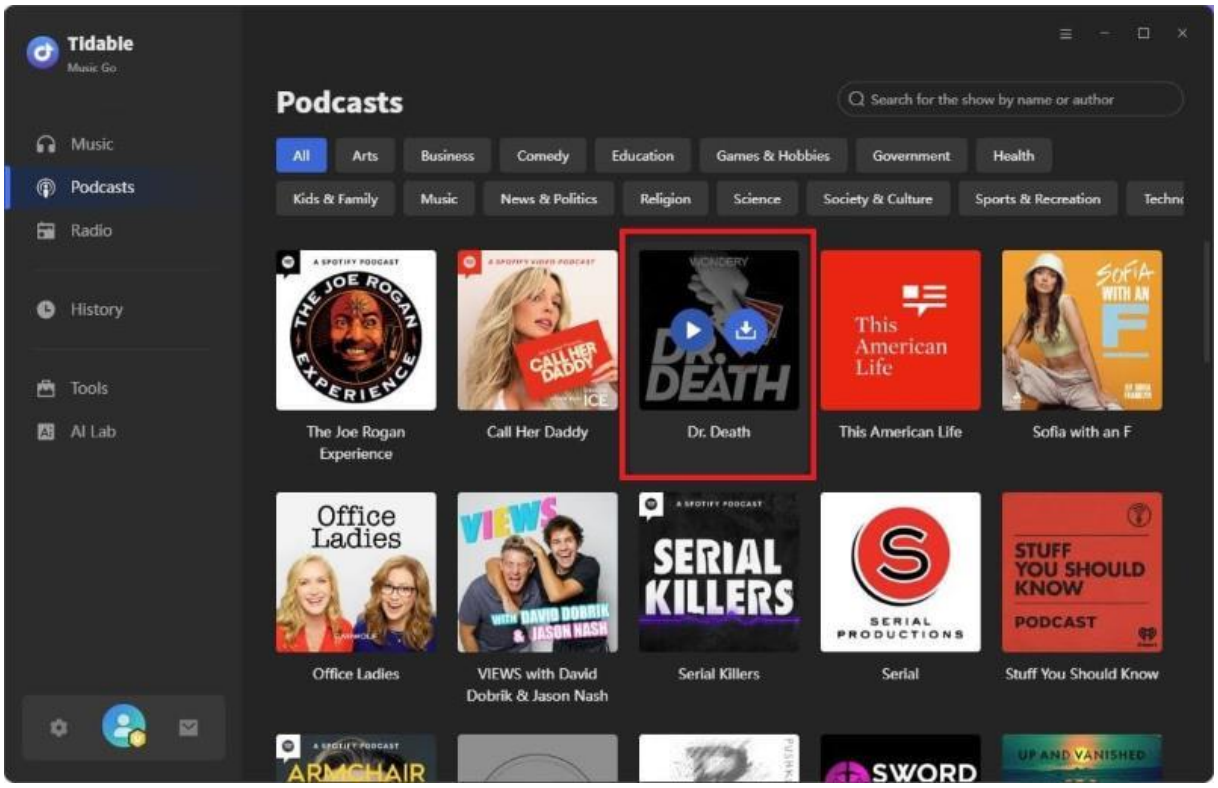
6. 1. Play Podcasts on Tidabie Music Go

Step 1: Launch Tidabie Music Go and go to the "**Podcasts**" module in the left-side menu.

Step 2: Find the podcast episodes you like. You may scroll up and down to pick any podcast you prefer. Or you can type in the podcast name in the search bar to find it directly.



Step 3: When the mouse is hovered over a specific podcast episode, you will see the icon and icon. When you tap on the icon, the latest episode will be played immediately. If you would like to listen to the previous episodes, you may tap on the episode cover to go to the detailed page, where you can play previous podcast episodes by clicking on the play icon next to each episode.



7. 2. Download Podcasts on Tidabie Music Go

Step 1: You can decide the output file path before downloading podcasts to your computer. You may head to the "**Settings**" section and change the output folder path under the "**Podcasts**" part.

Step 2: Navigate to the podcast's detailed page. You can hit the download icon next to each song and click "**Add**" to download one specific podcast.

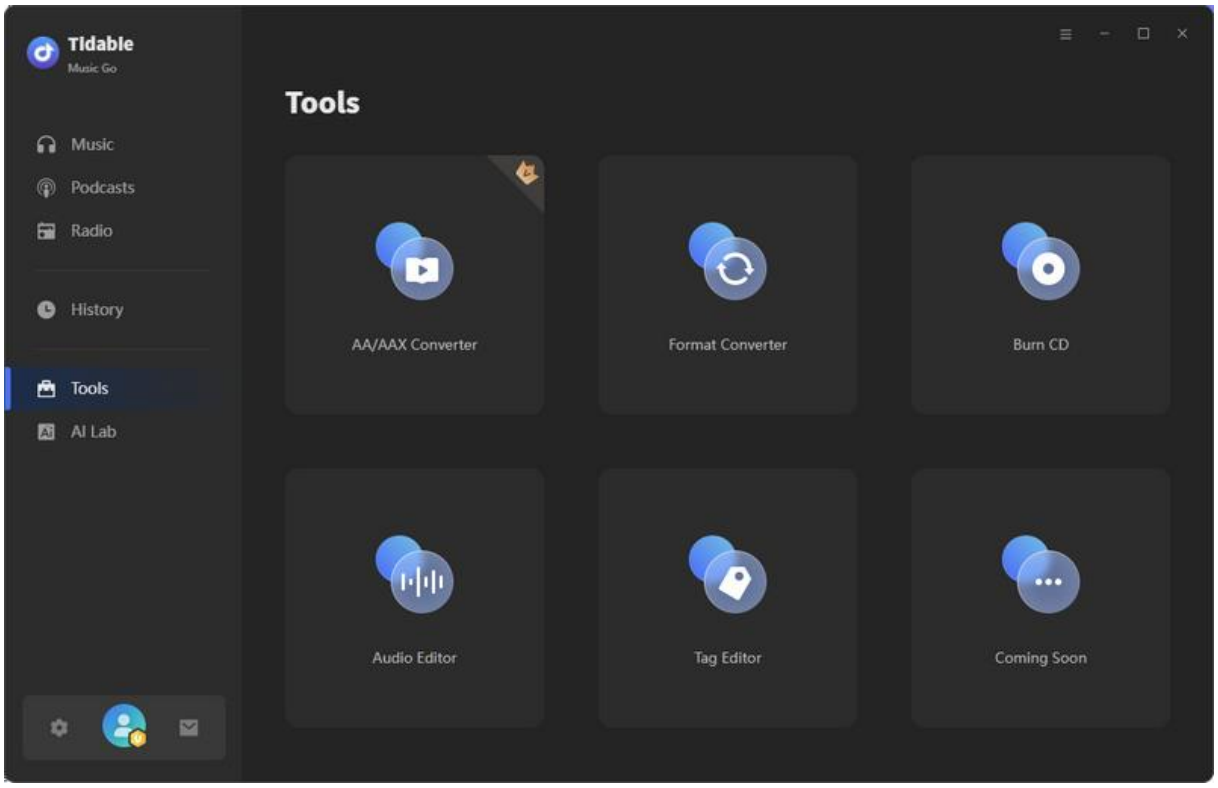
Tools on Tidabie

Tidabie Music Go has made significant improvements to enhance your user experience. It provides a range of powerful tools for you to enjoy additional features and functions. Let’s delve into how to make the most of these tools.



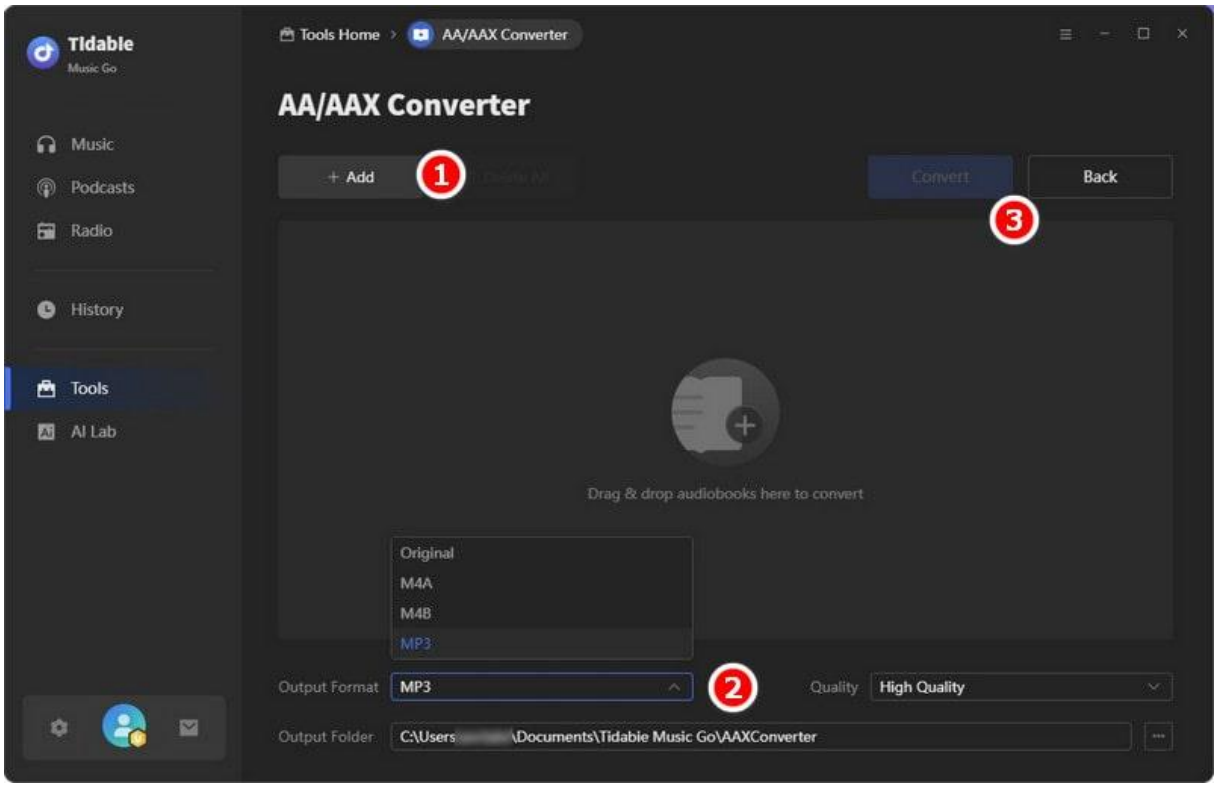
1. AA/AAX Converter

Tidabie offers a helpful tool for converting AA/AAX audiobooks into M4A, M4B, and MP3 formats, providing users with convenient options for their audiobook conversion needs.

Step 1: Go to the "**Tools**" section, and click on the "**AA/AAX Converter**" icon.

Step 2: You can directly import the audiobooks AA or AAX files to the converter by clicking "**+Add**".

Step 3: Set the output format (MP3/M4A/M4B), quality, and output folder before hitting the "**Convert**" button.

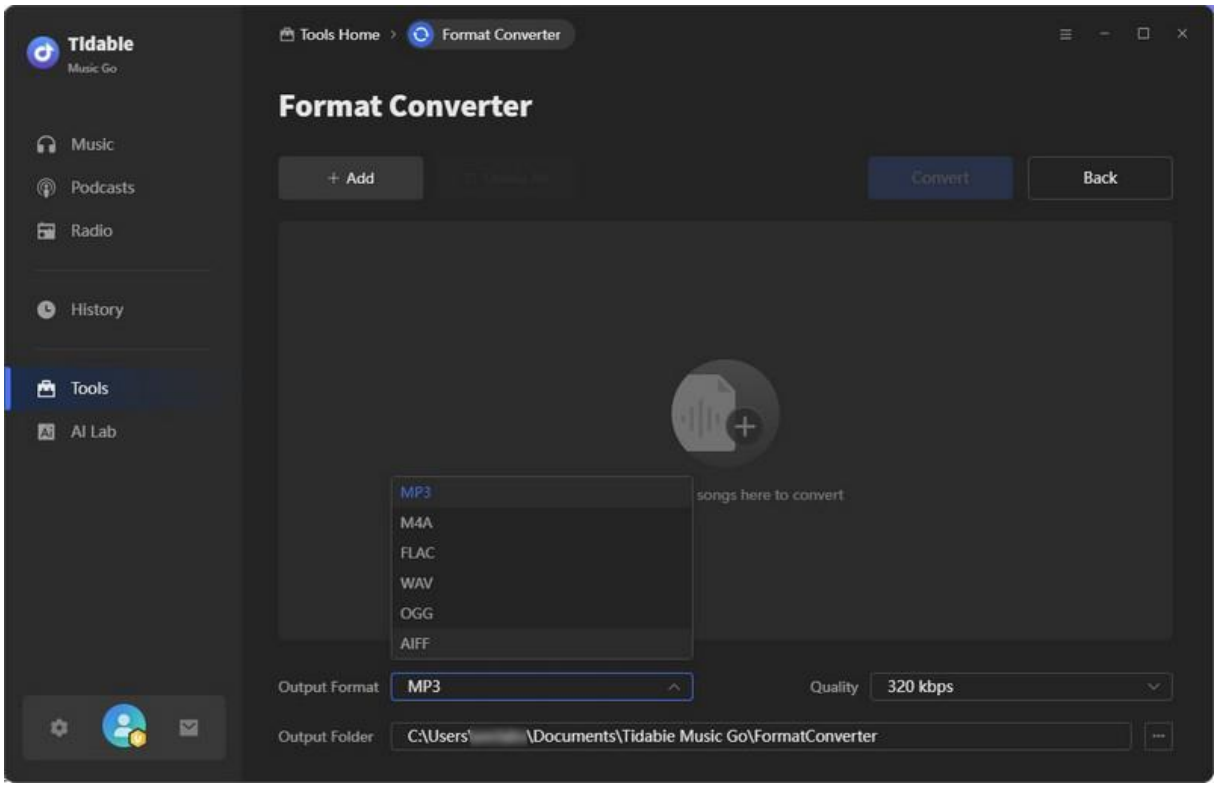


2. Format Converter

Format Converter is a versatile tool designed to facilitate the conversion of your local audio files to a variety of formats. With this tool, you can easily convert your audio files to popular formats such as MP3, M4A, FLAC, WAV, OGG, and AIFF, allowing you to enjoy your music across different devices and platforms.

Step 1: Change Output Settings

First, you need to go to the "**Settings**" module and customize the output settings to your preference under the "**Tools**" tab. You can select the output format, quality, and output path here.

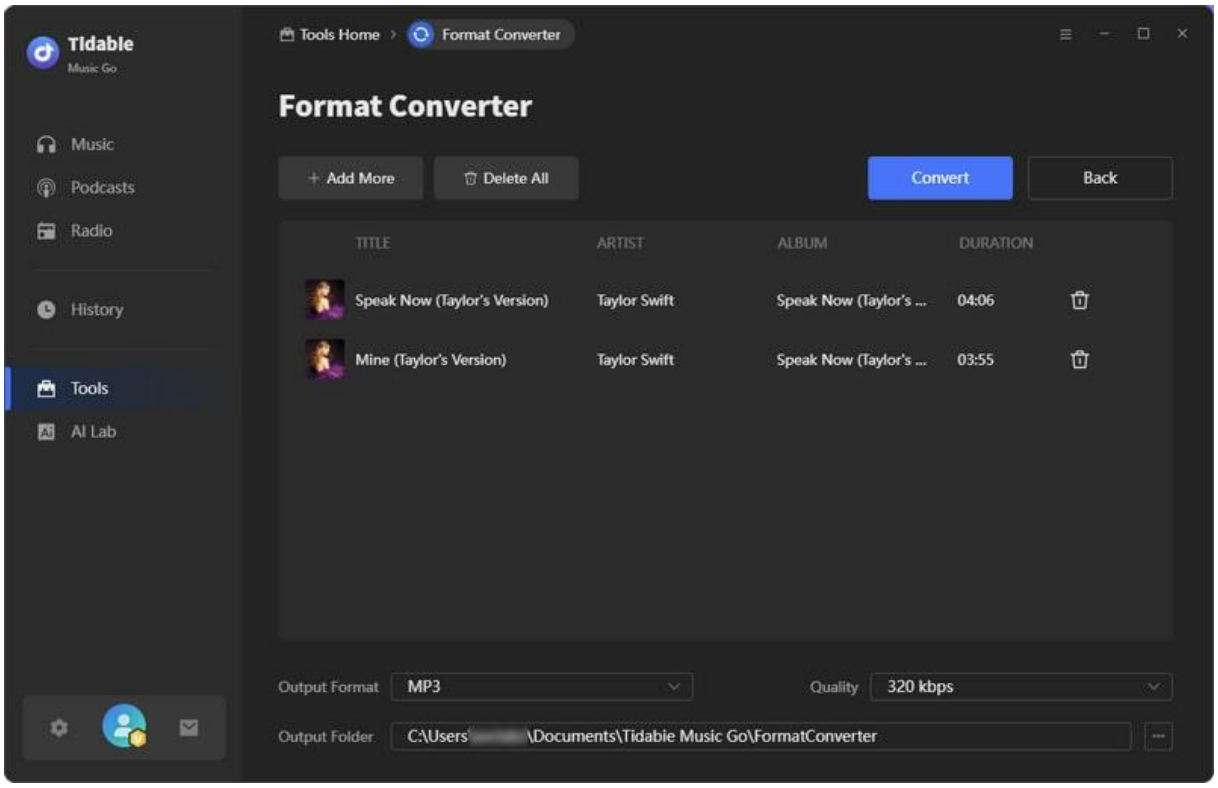


Step 2: Import Local Files

Head to the Tools section on the left-side menu bar, and select "**Format Converter**". Click on the "**+Add**" button to locate the local audio files that you want to convert. Select files and confirm. They will be added to Tidabie. You can also add the files by dragging and dropping them into the panel. The supported source formats include MP3, M4A, M4B, WAV, FLAC, OGG, AIFF, and M4R.

Step 3: Start Conversion

When all the preparations are done, simply click on the "**Convert**" button to start converting your files.



3. Burn CD

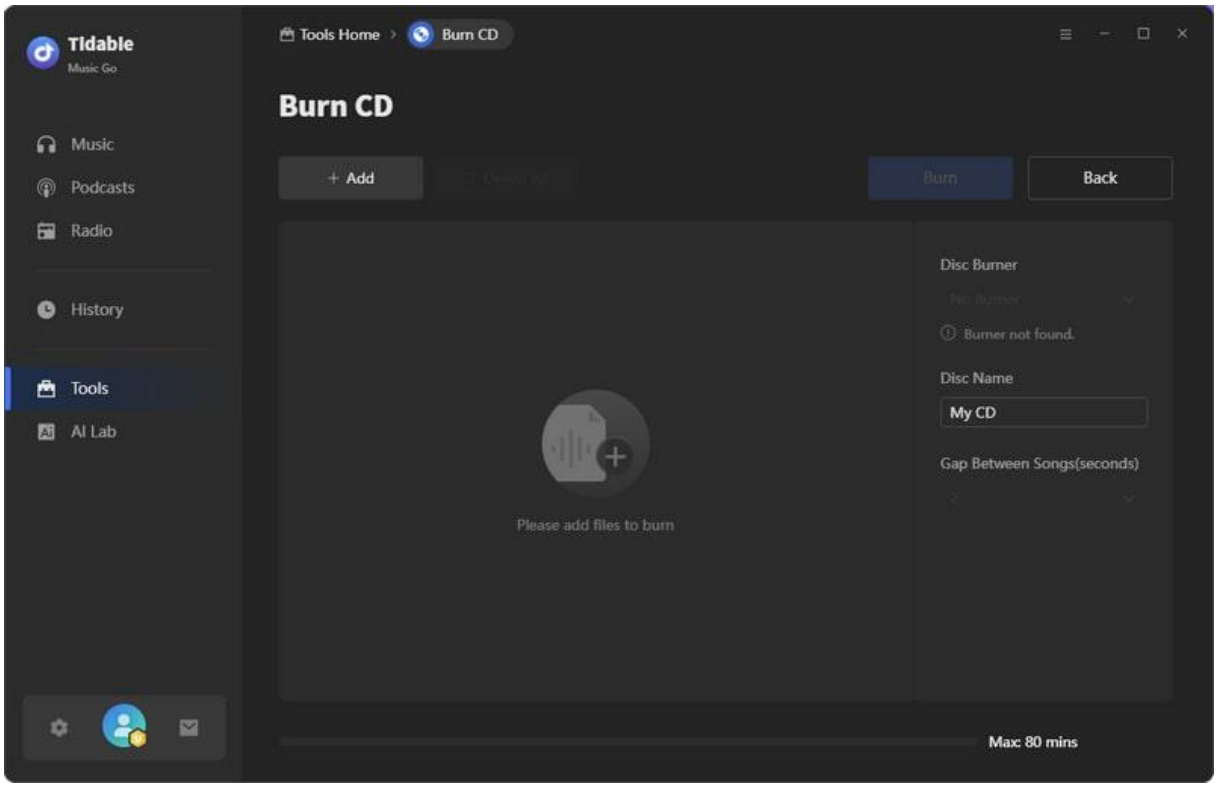
Tidabie offers a CD-burning function to give you the utmost convenience and flexibility.

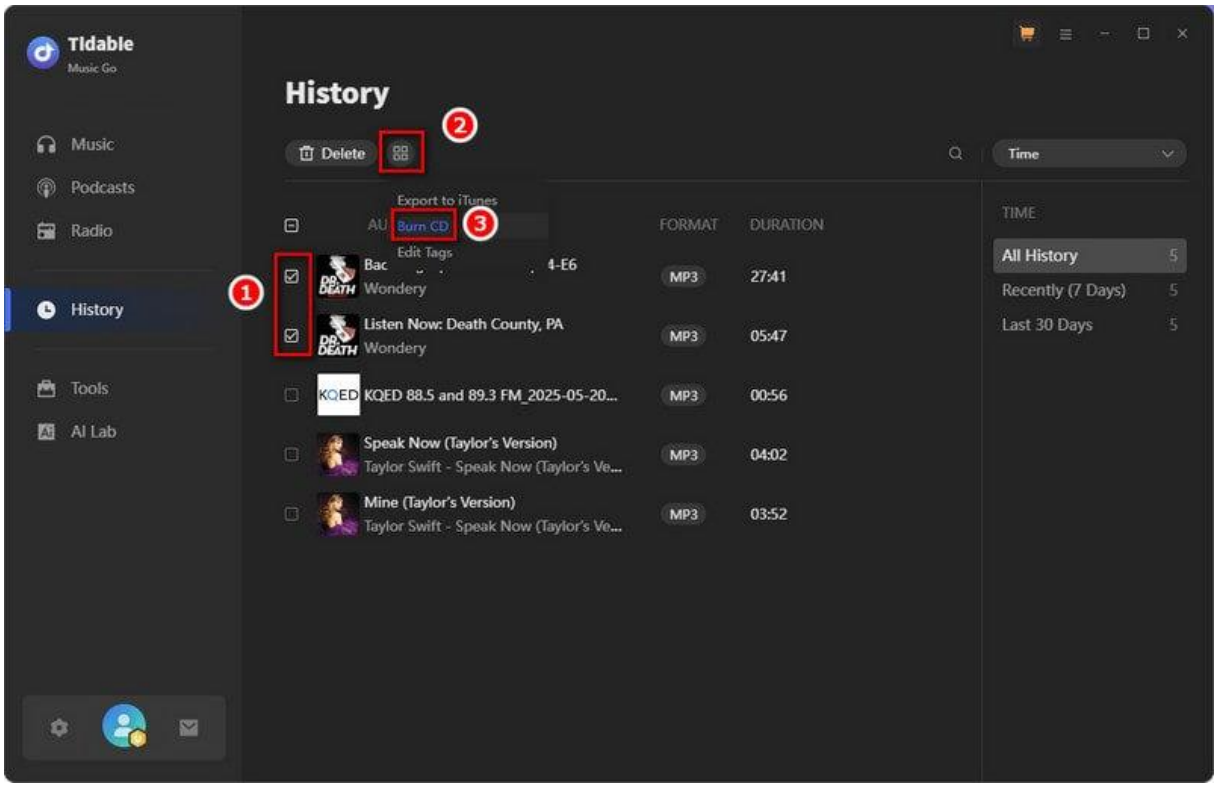
Step 1: Select Audio Files to Burn

Method 1: Navigate to the "**Tools**" section and click on the "**Burn CD**" icon. Insert your disc into your computer. You can either **drag and drop** your desired songs into the panel or click on "**+Add**" to browse your local folders and then add files.

Method 2: If you wish to burn the converted songs, go to the "**History**" tab, select the items, and then click on the menu icon above the download list to choose "**Burn CD**".

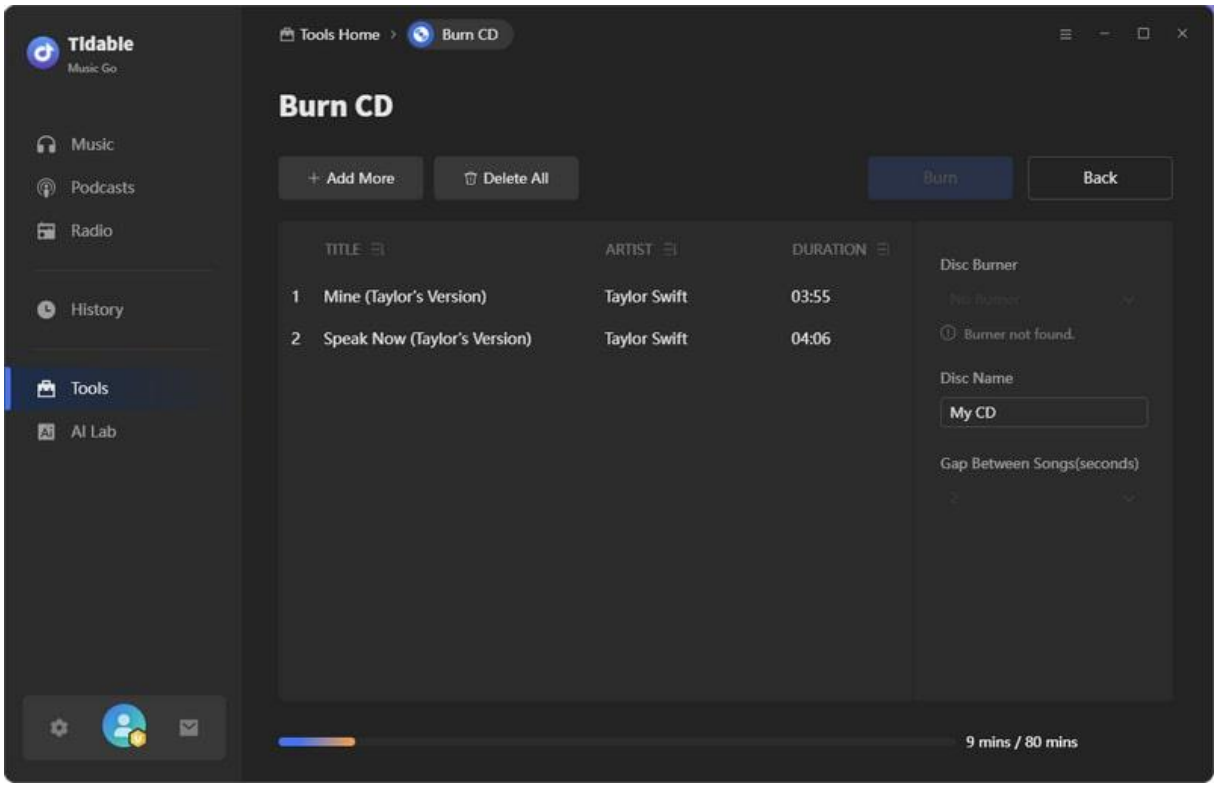
Note: The Burn CD tool is only available in the Windows version.





Step 2: Adjust Settings Accordingly and Burn CD

Change the burning settings, like the disc name and the gap between the songs. Then simply click on the "**Burn**" button to start burning songs to your CD.

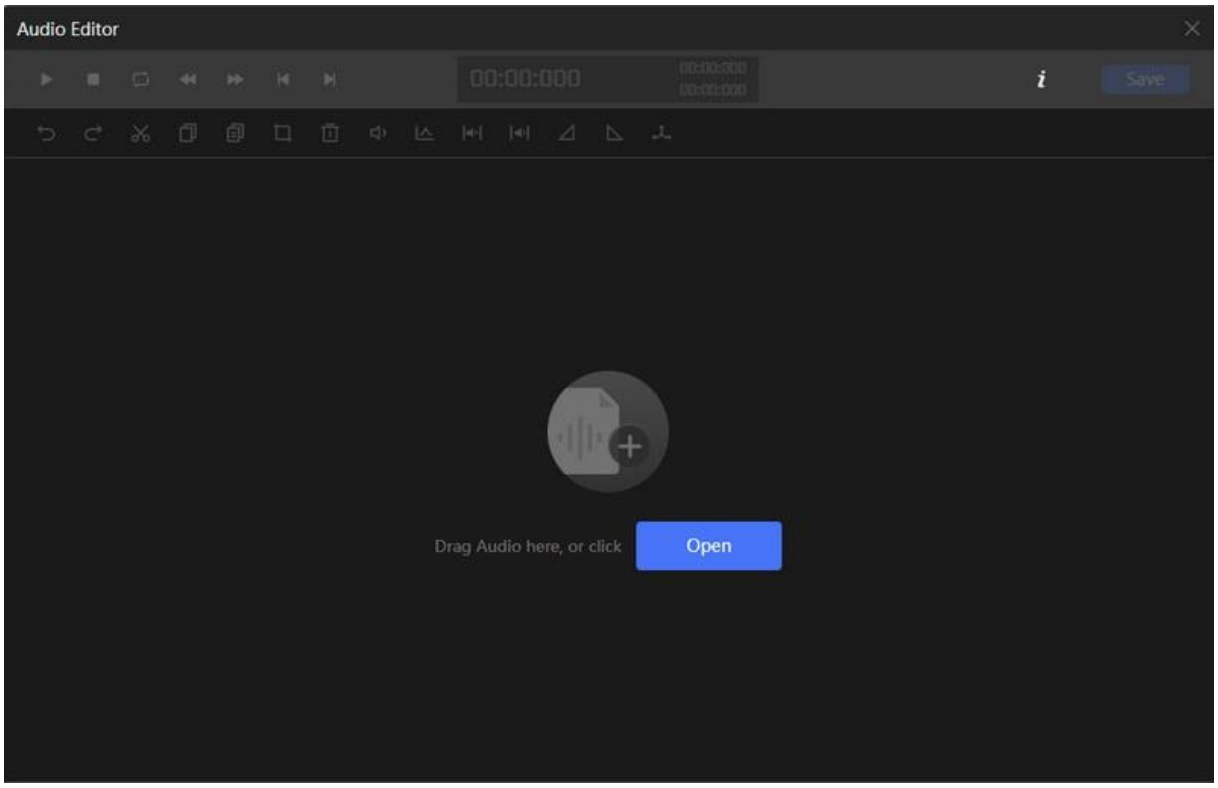


4. Audio Editor

Audio Editor is a powerful and easy-to-use audio editing tool that offers a wide range of features such as cutting, splicing, mixing, and applying effects to help you create professional and quality audio recordings.

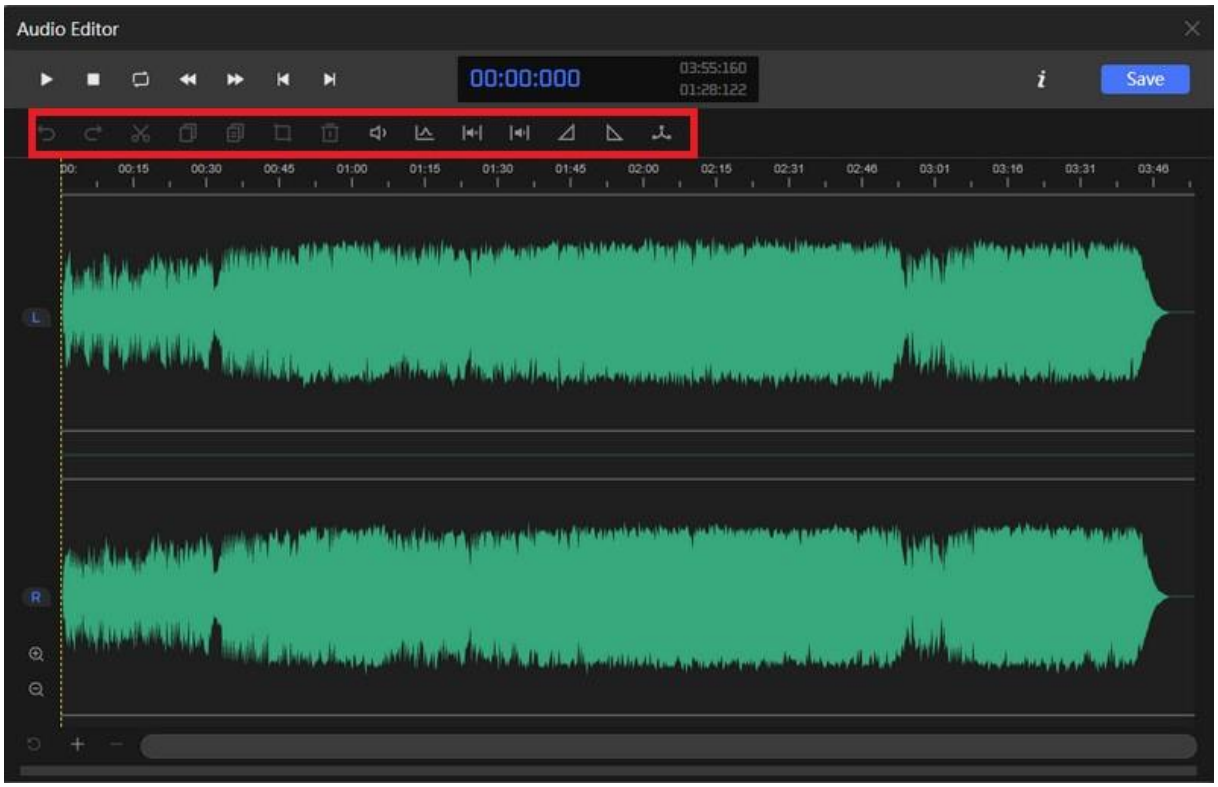
Step 1: Select Target Audio Files

Choose "**Audio Editor**" in the "**Tools**" section. Drag and drop your target audio files to the area, or import files by clicking "**Open**" to browse your local folders and then add files. After selecting the audio you want to edit, the editing window will pop out.



Step 2: Edit Audio and Save

Use the toolbar above the window to cut, splice, or mix the audio, etc.



Step 3: Select Output Settings

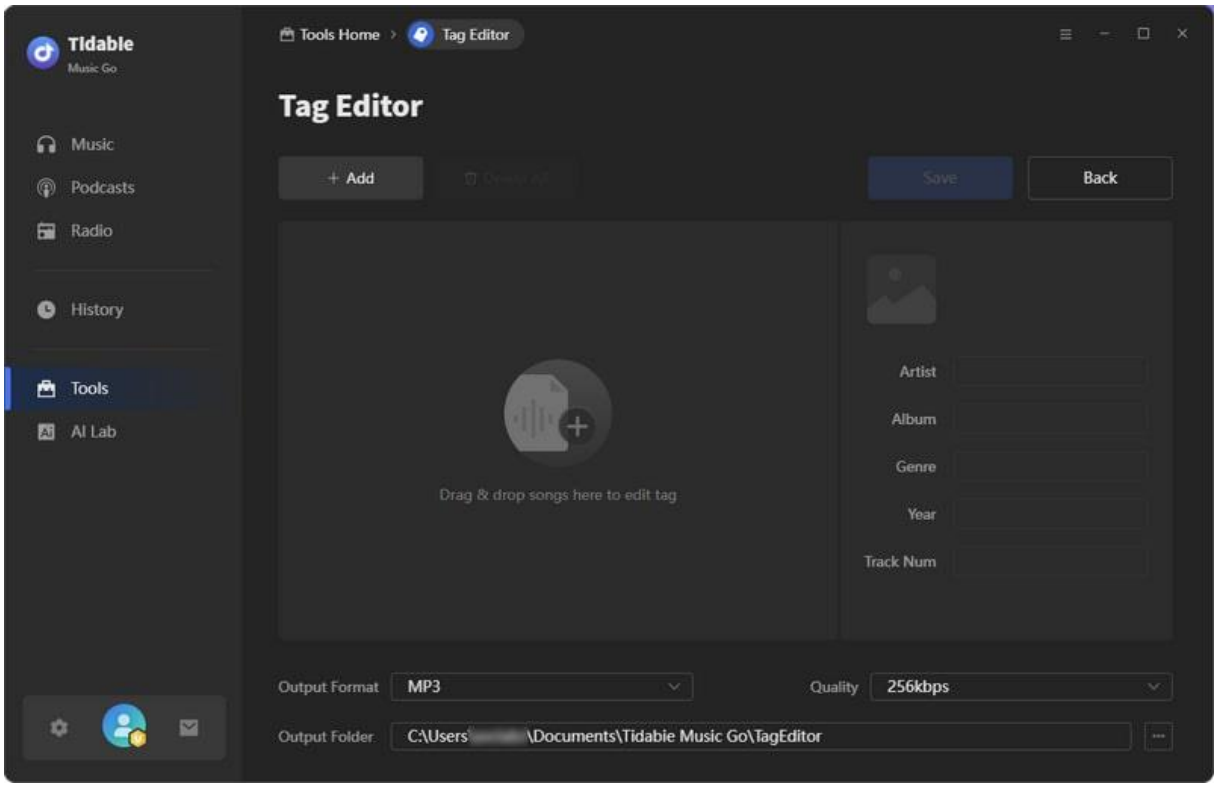
Change the file name, output format, bit rate, and output folder according to your references. Click **"OK"** to save the audio and wait a few seconds. The folder with your edited audio will be automatically opened.

5. Tag Editor

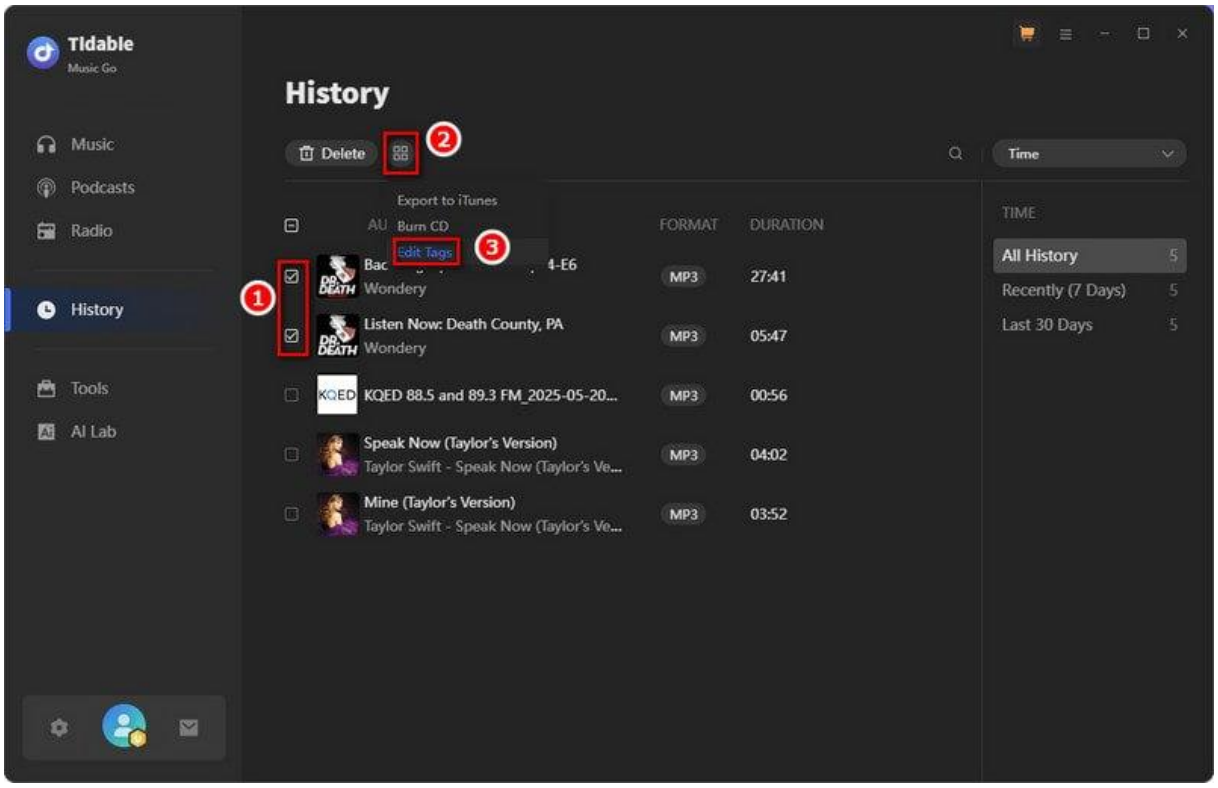
Tag Editor is a helpful tool that enables you to manually add tags to your local audio files or adjust the ID3 tags of the converted files to your liking. Here are the steps for utilizing this feature.

Step 1: Select Target Audio Files

Method 1: Choose "**Tag Editor**" in the "**Tools**" section. **Drag and drop** your target audio files to the area or import files by clicking "**+Add**". Tidabie will automatically read the tags of your audio.

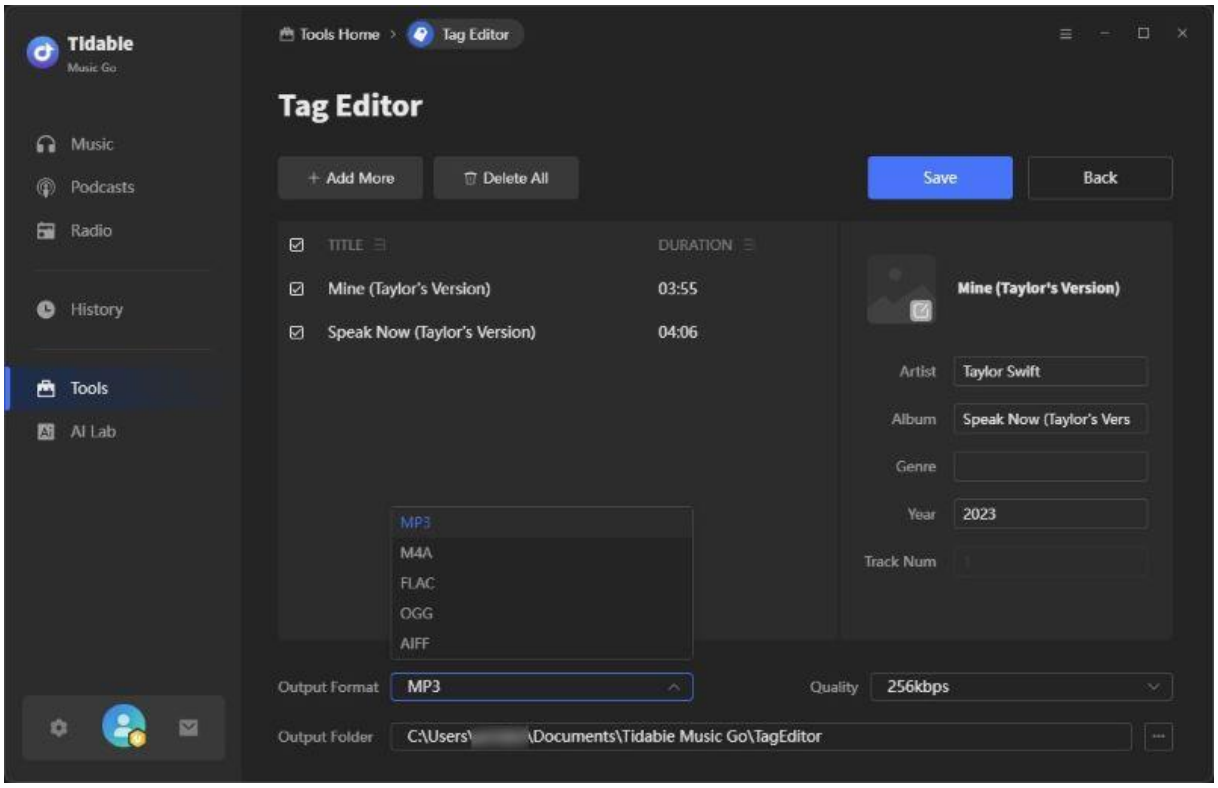


Method 2: If you want to edit the converted songs, head to the "**History**" tab, pick the items, and select "**Edit Tags**" after clicking on the above menu icon.



Step 2: Edit ID3 Tags and Save

When you have selected the item you wish to modify, proceed with adjusting the Artist, Album, Genre, Year, Track Number, and other relevant details. Upon completion, kindly click "**Save**" to apply the changes. Subsequently, the modifications will be visible in the output file on your local computer.

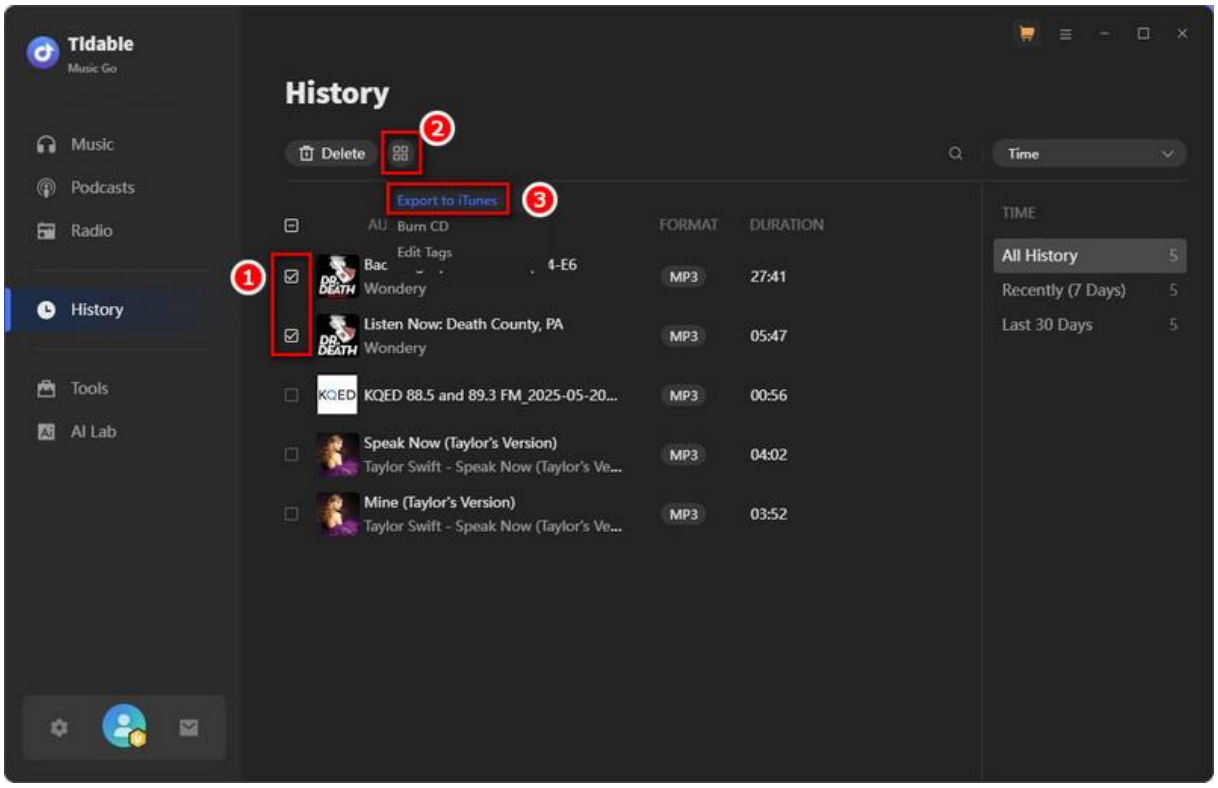


6. Export to iTunes

Tidabie offers a seamless transfer to iTunes, making it effortless to add your converted songs to your iTunes library with just a few clicks.

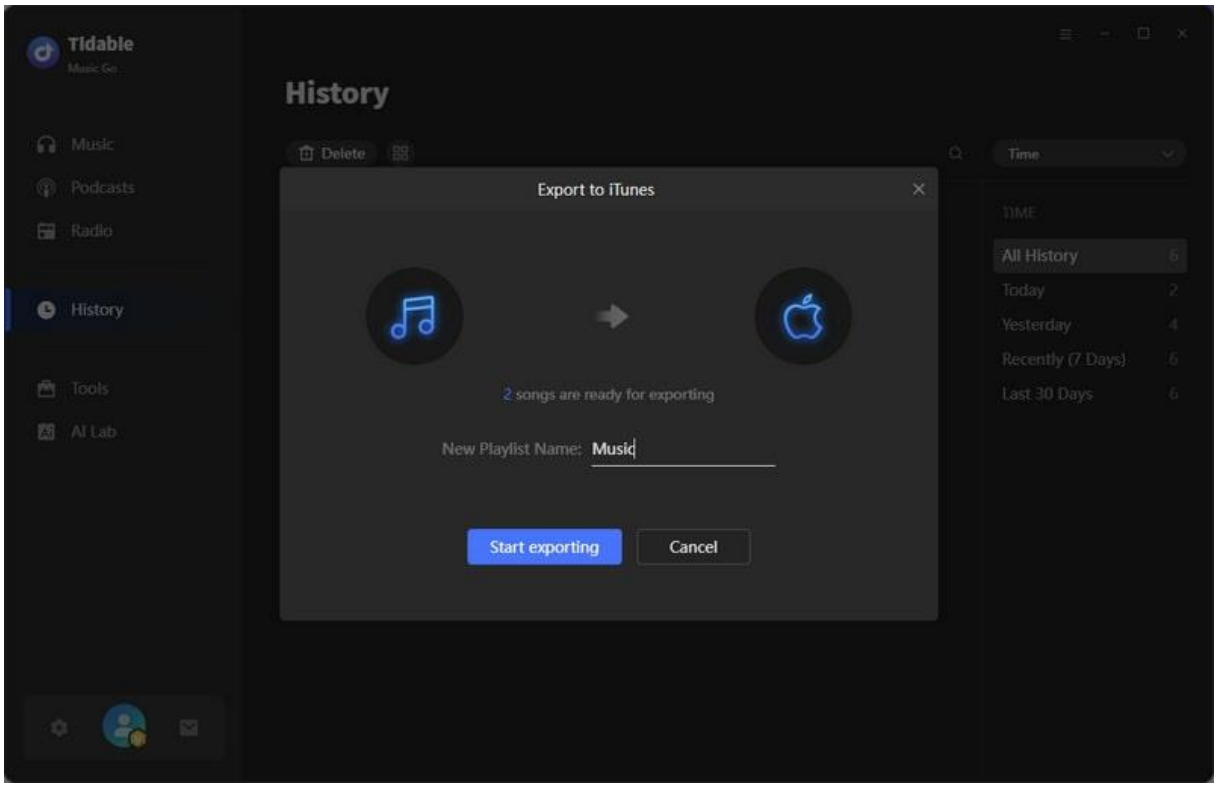
Step 1: Select Target Converted Songs

After the conversion, head to the "**History**" module. Choose the target songs, click the menu icon above the list, and select "**Export to iTunes**".



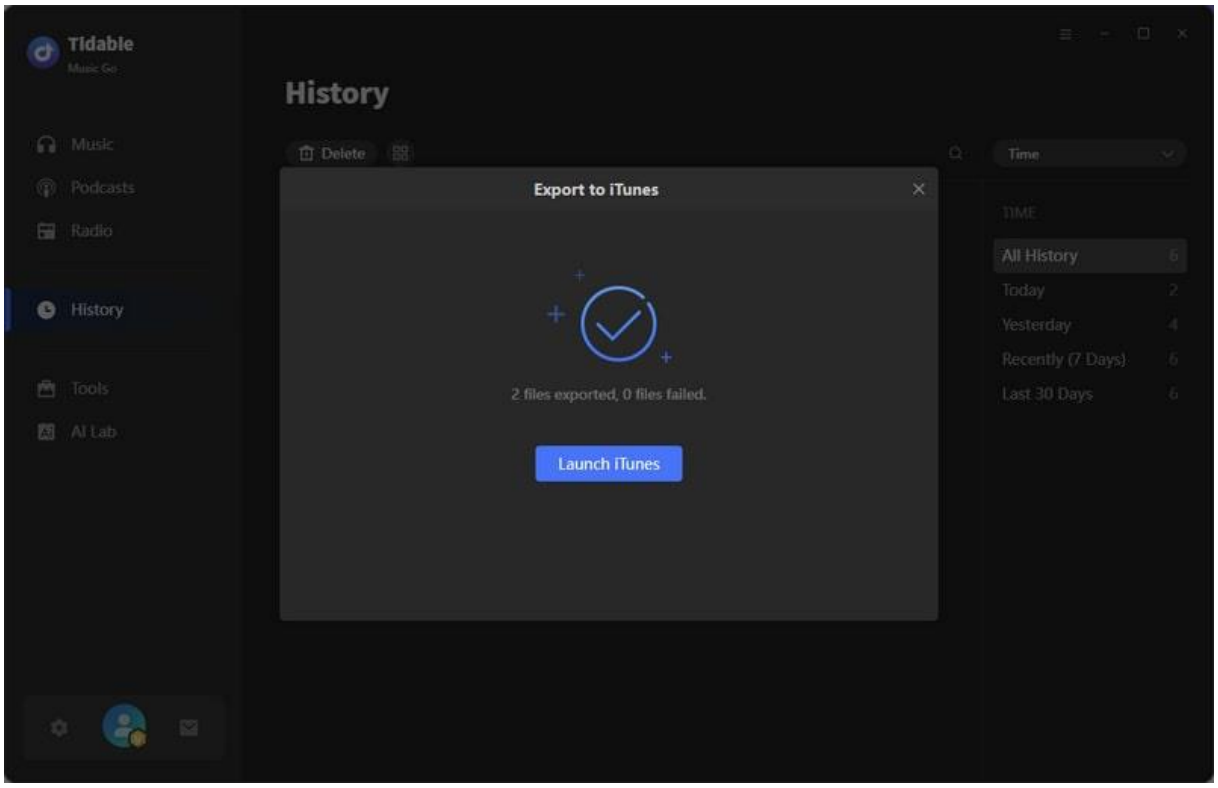
Step 2: Start Exporting Songs to iTunes

After making your selection, a pop-up window will appear. You can name the playlist and then click "**Start exporting**" to begin the transfer.



Step 3: Check Exported Songs in iTunes

After exporting, just tap on "**Launch iTunes**" to check the exported songs in your iTunes. You can find the playlist imported to iTunes in the "**All Playlists**" tab.

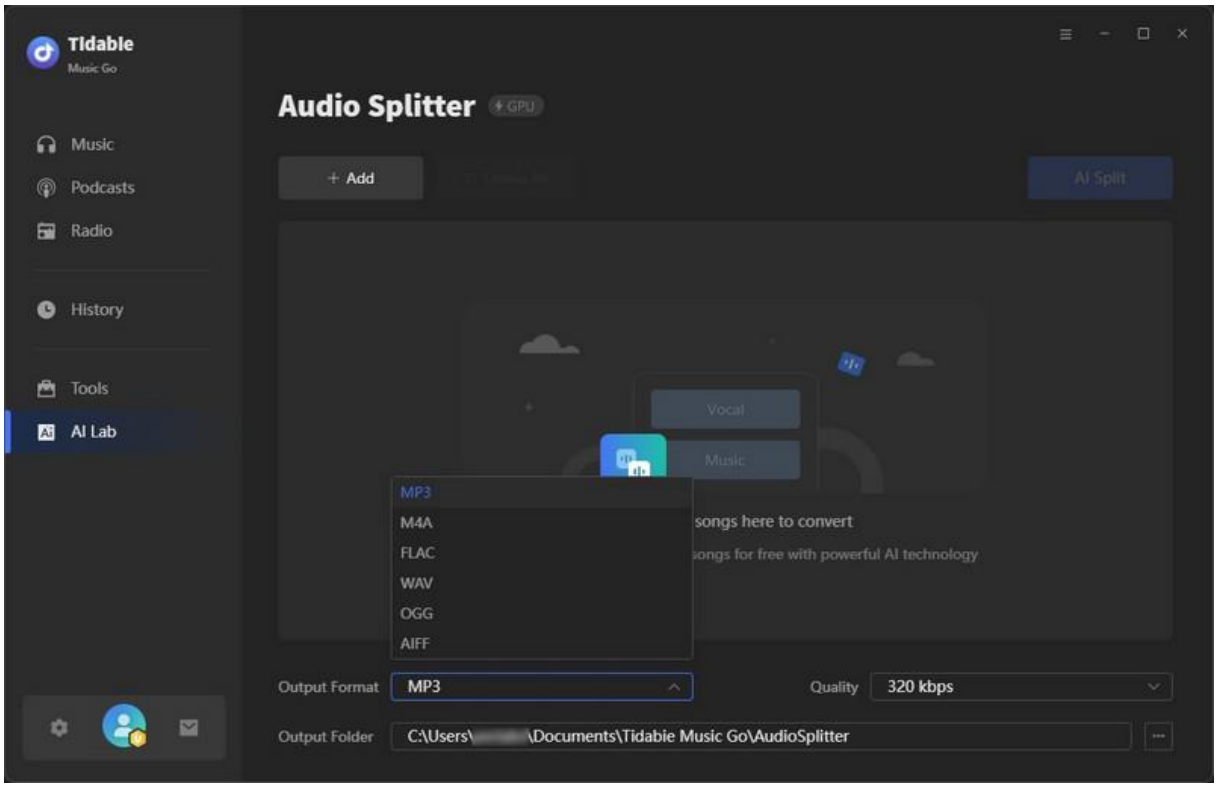


7. AI Audio Splitter (AI Lab)

The AI Lab (AI Audio Splitter) function is designed for splitting vocals and instrumental from a song. After splitting, the vocals and instrumental versions of the songs will be separated into two audio files and downloaded to your PC. With these audio files, you can make a karaoke version of the songs easily, or you can make multiple innovative usages afterwards.

Step 1: Head to "AI Lab" and Modify Output Settings

Tap on "**AI Lab**" to go to the "**Audio Splitter**" module. In this interface, you can modify the output settings like output format, quality, and output folder path.

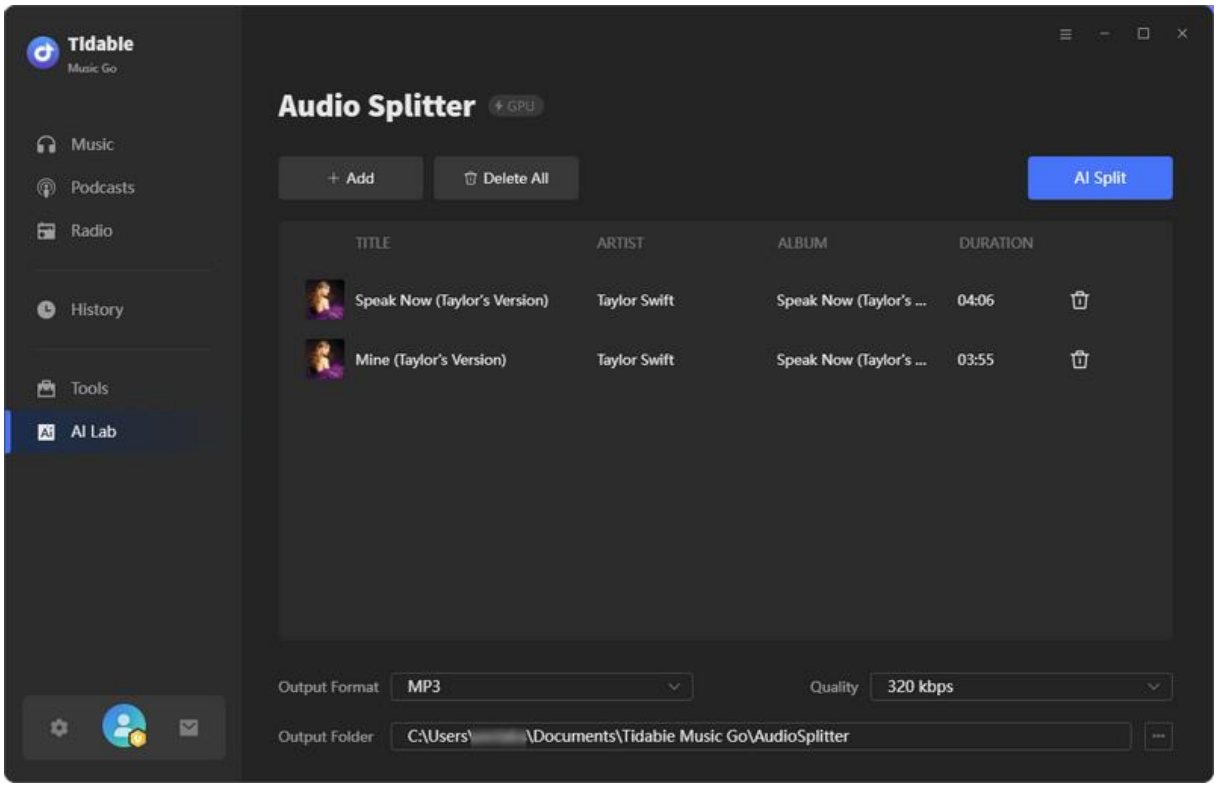


Step 2: Add Audio Files to Split Vocals and Instrumentals

Click on "**+Add**" and select the local music files that you want to split. Or you can drag and drop the files onto the panel directly.

Step 3: Hit "AI Split" to Start Conversion

Once you finish adding audio files, just hit the "**AI Split**" button to start conversion.



Step 4: Check Downloaded Vocals and Instrumental Audio Files

As the conversion is finished, the output folder will pop up by default. You can check the downloaded vocals and instrumental audio files in the output folder.
